A Theory of

Accumulation and Secular Stagnation Daniel Aronoff, 2018-01-08 Thomas Malthus identified a crucial tension at the heart of a market economy. While an accumulation of wealth is necessary to provide the capital investment needed to generate growth, too much accumulation will cause planned saving to exceed profitable investment, which will result in secular stagnation, a condition of low growth and underemployment of resources. Keynes drew inspiration from Malthus in his attempt to comprehend the causes of the Great Depression of the 1930s. Now Aronoff demonstrates how a related but slightly different aspect of Malthus' thought can illuminate one of the most pressing issues of our times. In *A Theory of Accumulation and Secular Stagnation*, Aronoff explores Malthus' ideas relating to secular stagnation and uses the insight gained to understand the origins of the subpar growth and tepid employment periodically punctuated by booms that has plagued the US economy since the turn of the millennium. He explains how the rise of mercantilism among Asian countries, principally China, and increased income concentration generated an upsurge in excess saving. This accumulation created a chronic deficiency in demand while also depressing interest rates, which generated a search for yield that fuelled periodic booms. **A Formula**

for Eradicating Racism Timothy McGettigan, Earl Smith, 2016-05-04 In this book Tim McGettigan and Earl Smith make the unprecedented argument that racism is a remediable form of suggestion induced sadism. Pamment, 2015-12-06 Community reparation for young offenders involves unpaid work such as painting and decorating, litter picking, and graffiti removal. Whilst remaining a major part of the youth justice landscape, concern has been raised about the poor quality of workplace provision. In this book Nicholas Pamment provides the first fully researched examination of community reparation. He establishes the most comprehensive model for the effective delivery of unpaid work, demonstrating the importance of meaningful work placements which facilitate key employability skills associated with reductions in re-offending. Drawing upon empirical evidence and the experience of offenders, he warns against a formulaic approach to workplace allocation where there is an over-reliance on low-cost menial tasks. His timely study concludes that more attention needs to be paid to the rehabilitative potential of community reparation, requiring the commitment and dedication of service providers.
