New to the LSP classroom?
A selection of monographs on successful practices Martina Vránová,2023-05-23 As Languages for Specific Purposes have always been defined as student oriented the rationale behind this volume is to use the rather neglected niche of the other necessary agent of language instruction and thus focus on the LSP practitioner This turn towards the instructor has been motivated by the fact that a great number of LSP practitioners enter their jobs without previous expertise They lack LSP education or they may not even have a background in applied linguistics This motivation has proven valid as many of the volume s contributors have faced this particular situation in their professional lives For insights into the LSP field and guidelines on the best practices they must rely on their colleagues who offer to share their experience through workshops conferences or papers which is what this volume provides The primary goal of this volume is to present considerations of what challenges LSP practitioners face and should be prepared for in their jobs and to provide practice tested methodological guidelines on such demanding teaching techniques as blended and flipped learning or tandem learning All papers have been written by LSP practitioners and researchers in higher education Thus this volume provides both guidance

and self reflection In other words it is written by experienced LSP practitioners for aspiring LSP practitioners about how they see themselves and what effort they make to meet the challenges of their jobs As proof that LSP practice is a global challenge papers have been collected from many European countries the USA Uruguay Even though most papers are naturally concerned with English being the lingua franca of today the collection also features guidelines for teaching Spanish French and Dutch for specific purposes Moreover the target disciplines these languages are taught for encompass business engineering sociology or medicine thus supporting the assumption of the universal character of problems LSP practitioners deal with *Professionalizing Your English Language Teaching* Christine Coombe, Neil J Anderson, Lauren

Stephenson, 2020-10-22 Written by leading experts in the field of TESOL this book explores the literature on various topic areas and demonstrates how teachers can increase their levels of professionalism by acquiring some general and field specific strategies Being a teaching professional is not simply about having the right teaching qualifications and good academic standing it involves a commitment to being innovative and transformative in the classroom and helping both students and colleagues achieve their goals A dictionary definition of professionalism reads as follows professionalism is the conduct aims or qualities that characterize or mark a profession or a professional person and it defines a profession as a calling requiring specialized knowledge and often long and intensive academic preparation Merriam Webster 2013 However according to Bowman 2013 professionalism is less a matter of what professionals actually do and more a matter of who they are as human beings Both of these views imply that professionalism encompasses a number of different attributes and together these attributes identify and define a professional The book is primarily intended for teachers at all levels and in all contexts who are interested in improving their professionalism and developing strategies that can take them to higher levels in the field of TESOL ELT The International Medical Graduate's Guide to US Medicine & Residency Training Patrick
