American Labor and the Cold War Robert W. Cherny,William Issel,Kieran Walsh Taylor,2004 The American labor movement seemed poised on the threshold of unparalleled success at the beginning of the post World War II era Fourteen million strong in 1946 unions represented thirty five percent of non agricultural workers Why then did the gains made between the 1930s and the end of the war produce so few results by the 1960s This collection addresses the history of labor in the postwar years by exploring the impact of the global contest between the United States and the Soviet Union on American workers and labor unions The essays focus on the actual behavior of Americans in their diverse workplaces and communities during the Cold War Where previous scholarship on labor and the Cold War has overemphasized the importance of the Communist Party the automobile industry and Hollywood this book focuses on politically moderate conservative workers and union leaders the medium sized cities that housed the majority of the population and the Roman Catholic Church These are all original essays that draw upon extensive archival research and some upon oral history sources

Contemporary culture is haunted by its media Yet in their ubiquity digital media have become increasingly banal making it

harder for us to register their novelty or the scope of the social changes they have wrought What do we learn about our media environment when we look closely at the ways novelists and filmmakers narrate and depict banal use of everyday technologies How do we encounter our own media use in scenes of waiting for e mail watching eBay bids programming as work and worrying about numbers of social media likes friends and followers Zara Dinnen analyzes a range of prominent contemporary novels films and artworks to contend that we live in the condition of the digital banal not noticing the affective and political novelty of our relationship to digital media Authors like Jennifer Egan Dave Eggers Sheila Heti Jonathan Lethem Gary Shteyngart Colson Whitehead Mark Amerika Ellen Ullman and Danica Novgorodoff and films such as The Social Network and Catfish critique and reveal the ways in which digital labor isolates the individual how the work of programming has become an operation of power and the continuation of the Californian ideology which has folded the radical into the rote and the imaginary into the mundane The works of these writers and artists Dinnen argues also offer ways of resisting the more troubling aspects of the effects of new technologies as well as timely methods for seeing the digital banal as a politics of suppression Bridging the gap between literary studies and media studies The Digital Banal recovers the shrouded disturbances that can help us recognize and antagonize our media environment **Understanding Jennifer Egan**
