Scott, 2012-11-28 Bringing together comparative case studies from Central Europe and South America this book focuses on new regions regions created as political projects of modernization and re scaling Through this approach it de codes New Regionalism in terms of its contributions to institutional change while acknowledging its contested nature and contradictions It questions whether these regions are merely a strategy of neo liberal adjustment to changing political and economic conditions or whether they are indicative of true reform greater citizen participation and empowerment It assesses whether these regions are really representing something new or whether they are a reconfiguration of traditional power relationships It provides a timely critical analysis of region building and the extent to which national processes of decentralization and sub national processes of regionalism can enhance the effectiveness and responsiveness of governance Reshaping Planning with Culture Greg Young, 2016-04-08 Planning is described as being increasingly sidelined by the impacts of neo liberal restructuring At the

same time culture is nowadays seen as the world's key intellectual resource possessing new creative weight in sociological economic and environmental terms This book argues that in the light of this cultural turn there is the opportunity to reposition planning and proposes an original practical and robust system of culturisation Culturisation is defined as the ethical critical and reflexive integration of culture into planning and potentially other areas such as public administration corporate strategy and development thinking Cultural theory planning theory global governance policy and recent innovative culturised practices are all explored to this end The new theoretical and practical approach put forward shows how deeper richer and more relevant ideas about culture can be utilized in planning and is illustrated with international examples and two major case studies detailing new vistas for a refurbished planning

Overcoming Fragmentation in Southeast Europe

Panayiotis Getimis, 2017-11-28 With the expansion of the European Union the countries of Southeast Europe have finally been brought together within one socio political entity The restructuring of these economies following globalization and neoliberalization has meant that this region has become much more open to geopolitical shifts and trends While the various countries have all entered into the slow process of European integration the historic fragmentation of this region has led to various conflicts and contradictions in the restructuring and transition of national economies This volume provides a theoretical and comparative overview which examines the prospects for spatial cohesion in this region With the need to handle persisting problems and conflicts from the past while coping with new economic and political structures Southeast Europe proves to be a challenging yet fruitful testing ground for how best to overcome fragmentation and establish a long term process of social and economic integration

across the globe from France to Australia from Nigeria to the United States as it observes international comparisons of the strategic planning process Many approaches and policies used today fail to capture the dynamics of urban regional transformation and are more concerned with maintaining an existing social order than challenging and transforming it Stewarded by a team of highly regarded and experienced researchers this book gives a synthetic view of the process of change and frames future directions of development It is unique for its combination of analysis of international case studies and reflection on critical nodes and features in strategic planning This volume will be of interest to students who study regional planning academics professional planners and policy makers

Housing as Governance Astrid Ley,2010 This book explores the dynamic roles and linkages of public sector institutions and civil society actors in housing provision for the urban poor in South Africa Based on actor centred and network theories two cases of civil society alliances are analysed The book reveals that existing civil society structures are hybrids that can oscillate between networks and organisations Moreover they establish informal governance spaces with state actors outside the institutional channels provided by government The emergence of oscillating structures and the informalisation of horizontal governance represent new challenges for local decision making processes Co operation and action oriented approaches in housing seemingly need to be based on a more detailed understanding of the complex interfaces which go far beyond the conventional ideal of partnerships and participation between sectors
