The

Practice of Philology in the Nineteenth-Century Netherlands Ton Kalmthout, Huib Zuidervaart, 2025-10-01

The Netherlands have a long and important tradition in scholarly philology For instance in the early days of Leiden University philology or the critical examination of classical texts was regarded as a cutting edge science This field of scholarship had far reaching implications on disciplines such as theology chronology astronomy history law and other demarcated bodies of knowledge identified as a separate science Regardless of the exact field of inquiry philologists as protectors and teachers of the written heritage always played a pivotal role in the formation of the cultural repertoire of the educated public As men of learning and high esteem philologists also exerted influence outside the cultural sphere especially in politics and religion The ever changing composition of the philological frame of reference made no difference in this respect But in the nineteenth century the practice of philology was passing a crucial phase of change In both its object of study and in its methods several fundamental modifications occurred Texts in the vernacular and national philologies attracted more and more attention of the public and neo philology succeeded in taking over the central position traditionally occupied by classical philology Subfields such as linguistics edition technique and history grew into new more or less independent sub disciplines whereas scientific methods such as stemmatology and comparative approaches were introduced in the humanities This redesigned the landscape of philology radically New boundaries became apparent and existing ones were questioned or drawn sharper At the time philology underwent an accelerated process of differentiation and professionalization Philology demarcated its own

more or less independent sphere with a specific authority The establishment of a branch of national philology can be regarded as an example of discipline formation in the humanities This fascinating process of change and the search for new boundaries in Dutch philology is highlighted in this book **The Practice of Philology in the Netherlands in the Nineteenth Century** the first book on this topic in the English language Dutch Foreign Policy Since 1815 A. Vandenbosch, 2012-12-06 This study was begun in 1937 with the help of a research grant from the Social Science Research Council and a semester s sabbatical from the University of Kentucky It was interrupted by the pressure of events governmental service during the war and the flood of students following it A Fulbright lectureship at Leiden University during 1957 58 finally gave me the opportunity to bring it to completion I am deeply indebted to the Social Science Research Council and wish to express my appreciation for its aid I wish also to express my gratitude to the University of Kentucky for the semester s sabbatical in 1937 38 and the year s sabbatical in 1957 58 Without this generous aid the study could not have been made I wish to thank the personnel of the Royal Library the Peace Palace Library and the library of the States General all at The Hague and of Leiden University library for their never failing courtesy and unwearied assistance I am also indebted to a number of persons in the Netherlands Ministry of Foreign Affairs chiefly in the archives division That their help was not more extensive was not due to unwillingness on their part to be of service To the University of California Press I am indebted for permitting me to draw heavily on a chapter of my book **The Dutch East Indies** which was published by it but is now out of print **The Uses of the Middle Ages in Modern European States** R. Evans, G. Marchal, 2010-12-20 An assessment of the role of the Middle Ages in national historiography and in modern conceptions of national identity looking at relatively young nations and regions which claim national traditions but were slow to achieve or regain separate statehood Examples range from Ireland and Iceland through Austria and Italy to Finland and Greece **The Kuyper Center Review, Volume 4** Gordon Graham, John Bowlin, 2014-04-20 This volume of essays is a new step by the Abraham Kuyper Center for Public Theology at Princeton Theological Seminary to stimulate new work in the broad area of Reformed theology and public life The contributions here deal largely with political themes some contemporary some historical **The Making of the Democratic Party in Europe, 1860-1890** Anne Heyer, 2022-02-15 This book analyses the emergence of modern parties in nineteenth century Europe and explores their connection with the slowly developing institution of democracy The close relationship between party and democracy was established by the founders of the first modern parties who presented themselves as representatives of the people Focusing on the ideas and practices of party founders this book moves away from the traditional view that party formation was the result of industrialisation It instead shows that the response of party founders was to frame and establish the modern party as an alternative to existing models of political representation and one that was characterised by popular participation In order to mobilize their followers party founders gave new meaning to existing structures and developed new practices of political organization The result was the creation of organizations that continue to

shape the history of modern democracy Exploring the foundation of three political parties the German Social Democratic Workers Party SDAP the Dutch Anti Revolutionary Party ARP and the British National Liberal Federation the author analyses the phenomenon of innovative party formation in nineteenth century Europe before the democratic mass membership party had become a widely accepted concept Taking a transnational and comparative approach this book illustrates the decisive role of party founders in the formation of modern democracy making it an essential read for anyone researching the history of democracy and political parties

De geschiedenis van Nederland in onzen tijd: 1848-1853 Jan Anthony de Bruyne, 1891 *Gender, Power and Identity in the Early Modern House of Orange-Nassau* Susan Broomhall, Jacqueline Van Gent, 2016-08-12 How do gender and power relationships affect

the expression of family House and dynastic identities The present study explores this question using a case study of the House of Orange Nassau whose extensive visual material and archival sources from both male and female members enable the authors to trace their complex attempts to express gain and maintain power in texts material culture and spaces as well as rituals acts and practices The book adopts several innovative approaches to the history of the Orange Nassau family and to familial and dynastic studies generally Firstly the authors analyse in detail a vast body of previously unexplored sources including correspondence artwork architectural horticultural and textual commissions ceremonies practices and individual actions that have surprisingly received little attention to date individually and consider these as the collective practices of a key early modern dynastic family They investigate new avenues about the meanings and practices of family and dynasty in the early modern period extending current research that focuses on dominant men to ask how women and subordinate men understood family and dynasty in what respects such notions were shared among members and how it might have been fractured and fashioned by individual experiences Adopting a transnational approach to the Nassau family the authors explore the family s self presentation across a range of languages cultures and historiographical traditions situating their representation of themselves as an influential House within an international context and offering a new vision of power as a gendered concept

Challenging the Spirit of Modernity Harry Van Dyke, 2019-10-02 God s word illumines the darkness of society Dutch politician and historian Groen van Prinsterer s *Unbelief and Revolution* is a foundational work addressing the inherent tension between the church and secular society Writing at the onset of modernity in Western culture Groen saw with amazing clarity the dire implications of abandoning God s created order for human life in society Groen s work served as an inspiration for many contemporary theologians and he had a profound impact on Abraham Kuyper s famous public theology In *Challenging the Spirit of Modernity* Harry Van Dyke places this seminal work into historical context revealing how this vital contribution still speaks into the fractured relationship between religion and society A deeper understanding of the roots of modern secularism and Groen s strong faithful response to it gives us a better grasp of the same conflict today
