## **The Complete Idiot's Guide to Natural Health for Dogs and Cats**

**Liz Palika,2011-12-06** Includes the latest advice from well known and respected veterinarians

**A New Owner's Guide to Pugs** Kati B.,2012-03-12 ABOUT THE BOOK There is something very distinctive about pugs The toy dogs have wrinkled faces and curly tails as well as a pudgy build Their glossy coat and square shape make them appealing as friendly and non threatening dogs It isn t just their looks that make them so unique though they have big personalities inside those small bodies EXCERPT FROM THE BOOK Entropion is caused by pugs eyelashes irritating the eyeball It is usually easy to treat by a veterinarian but left untreated can cause inflammation or more serious

problems Bilateral cataracts are dense spots on the eyeball These spots can cause blindness In some cases surgery can help to fix the cataracts or prevent further blindness Progressive retinal atrophy PRA is a common condition in various dog breeds It is caused by a deterioration of the vessels around the retina which can cause blindness The first symptom is usually night blindness followed by deteriorating day blindness Hip dysplasia is also relatively common in the breed and is usually caused by abnormal joint development It can cause severe stiffness in the joints along with significant pain It is usually noticed when the pug begins to go lame caused by his body producing bone spurs which are intended to stabilize the joint Elongated soft palate is one of the well known pug health problems It is the obstruction of airways which leads to excessive gasping for air and in some cases the blocking of vocal cords It can be corrected with surgery in most cases Buy a copy to keep reading
