Group Creativity Innovation Through Collaboration:

Group Creativity Paul B. Paulus, Bernard Arjan Nijstad, 2003 *Group Creativity* summarizes the developments in the research on the processes involved in group or team creativity and innovation The volume draws from a broad range of perspectives such as cognition groups creativity information systems and organizational psychology **The Oxford Handbook of Group Creativity and Innovation** Paul B. Paulus, Bernard Arjan Nijstad, 2019 Although creativity is often considered an individual ability or activity innovation in teams and organizations involves collaboration of people with diverse perspectives knowledge and skills The effective development of collaborative innovations and solutions to problems is critical to the success of teams and organizations but research has also demonstrated many factors which tend to limit the effectiveness of collaborative innovation of groups and teams This volume highlights recent theoretical empirical and practical developments that provide a solid basis for the practice of collaborative innovation and future research It draws from a broad range of research perspectives including cognition social influence groups teams creativity communication networks information systems organizational psychology engineering computer science and the arts This volume is an important source of information for students scholars practitioners and others interested in understanding the complexity of the group creative process and tapping the creative potential of groups and teams *Handbook of Organizational Creativity* Roni Reiter-Palmon, Sam Hunter, 2023-06-22 *Handbook of Organizational Creativity Individual and Group Level Influences* Second Edition covers creativity from many perspectives in two unique volumes including artificial Intelligence work creativity within specific applied domains e g engineering science therapy and coverage of leadership The book includes individual team and organizational level factors and includes organizational interventions to facilitate creativity such as training Chapters focus on creative abilities and creative problem solving processes along with individual differences such as motivation affect and personality New chapters include the neuroscience of creativity creativity and meaning morality ethicality and creativity and creative self beliefs Sections on group level phenomena examine team cognition team social processes team diversity social networks and multi team systems and creativity Final coverages includes different types and approaches to leadership such as transformational leadership ambidextrous leadership leader follower relations and more Focuses on the key need to increase creativity and innovation in organizations Identifies the factors influencing organizational creativity Includes individual group and organizational influences Identifies personality traits and beliefs affecting creativity Discusses problem solving processes idea evaluation and diverent thinking Contains new coverage of virtual teams creative meetings and multiteam systems This expanded second edition is divided into two volumes For further information on Leadership Interventions and Macro Level Issues visit <https://shop.elsevier.com/books/handbook-of-organizational-creativity-reiter-palmon/9780323918411> **The Oxford Handbook of Group and Organizational Learning** Linda Argote, John M. Levine, 2020-01-02 Groups and organizations vary dramatically in their ability to learn Some acquire

substantial knowledge as a function of experience while others do not. In groups learning can occur at the level of the individual member and or the group as a whole. In organizations learning can occur at both of these levels as well as that of the wider collective. Besides varying in the amount and kind of information they acquire, groups and organizations also vary regarding their success in retaining knowledge and transferring it to other units. In general, groups and organizations that are proficient in acquiring, retaining, and transferring knowledge are more productive and more enduring than their less able counterparts. The goal of this handbook is to bring together cutting edge theoretical and empirical work on group and organizational learning by leading scholars from several disciplines. Because many of the same processes influence learning in groups and organizations, including both kinds of learning in the same volume has the potential to facilitate the integration of knowledge and the cross fertilization of ideas. These benefits are reciprocal in that research at the group level can shed light on how organizations learn, whereas research at the organizational level can illuminate how groups learn. By clarifying similarities and differences in the processes that underlie learning in groups and organizations, the handbook advances understanding of the causes and consequences of learning in collectives of varying size and complexity.

Assessment of Responsible Innovation Emad Yaghmaei, Ibo van de Poel, 2020-11-11. Responsible Innovation encourages innovators to work together with stakeholders during the research and innovation process to better align the outcomes of innovation with the values, needs, and expectations of society. Assessing the benefits and costs of Responsible Innovation is crucial for furthering the responsible conduct of science, technology, and innovation. However, there is until now only limited academic work on Responsible Innovation assessment. This book fills this lacuna. *Assessment of Responsible Innovation: Methods and Practices* presents tools for measuring, monitoring, and reporting upon the Responsible Innovation process and the social, environmental, scientific, and economic impacts of innovations. These tools help innovators to mitigate risk and to strengthen their strategic planning. This book aligns assessment tools and practices with the UN Sustainable Development Goals (SDGs). The prospects as well as the limitations of various Responsible Innovation assessment approaches and tools are discussed, as well as their applicability in various industry contexts. The book brings together leading scholars in the field to present the most comprehensive review of Responsible Innovation tools. It articulates the importance of assessment and value creation, the different metrics and monitoring systems that can be deployed, and the reporting mechanisms, including the importance of effective communication.
