Growing Old In An Older Brazil Growing Old In An Older Brazil:

Growing Old in an Older Brazil Ole Hagen Jorgensen, Romero Rocha, Anna Fruttero, 2011-09-07 Brazil is in the middle of a profound socioeconomic transformation driven by demographic change. Because of profound changes in mortality and especially fertility over the past four decades the population at older ages then begun to increase a trend that will become more and more rapid as time progresses. While it took more than a century for France's population aged 65 and above to increase from 7 to 14 percent of the total population the same demographic change will occur in the next two decades in Brazil between 2011 and 2031. The elderly population will more than triple within the next four decades from less than 20 million in 2010 to approximately 65 million in 2050. On the one side these shifts in population age structure will lead to substantial additional fiscal pressures on publicly financed health care and pensions along with substantial reductions in fiscal pressures for publicly financed education. Public transfers in Brazil have been very effective in reducing poverty among the elderly in both urban and rural areas. However without substantial changes the aging of the population will put a strain on the current system that will result in some critical trade offs with consequence for poverty among other vulnerable groups and for the growth prospects of the country. On the other side given the strong association between people's economic behavior and the life cycle changes in the population age structure have a major impact on economic development. This book investigates the impact of demographic changes on several dimensions of the Brazilian economy and society. It does so in a comprehensive and systematic way that captures the broad complexity of issues from economic growth to poverty from public financing of social services and transfers to savings from employment to health and long term care and their interrelations.

OECD Economic Surveys: Brazil 2013 OECD, 2013-10-22 OECD's 2013 economic review of Brazil examines recent economic developments policies and prospects. This edition's special chapters cover productivity and competitiveness of Brazilian firms and income distribution and the new middle class.

Aging Across Cultures Helaine Selin, 2022-01-01 This volume brings together chapters about aging in many non Western cultures from Africa and Asia to South America from American Indians to Australian and Hawaii Aborigines. It also includes articles on other issues of aging such as falling dementia and elder abuse. It was thought that in Africa or Asia elders were revered and taken care of. This certainly used to be the case. But the Western way has moved into these places and we now find that elders are often left on their own or in institutions as younger people have migrated to other cities and even countries. Grandparents often find themselves being parents to their grandchildren a far cry from the kind of life they believed they would have as they aged. This book will explore all these issues and will be of use to students and researchers in this relatively new field.

The Political Economy of Upgrading Regimes: Brazil and beyond Michael Schedelik, 2023-06-20 Today's middle income countries tend to be locked in a middle income trap unable to transition to higher income levels due to rising costs and declining competitiveness. While there is a broad consensus that upgrading these economies towards innovation led growth is

imperative countless institutional and political economy obstacles remain This book brings together analytical perspectives from comparative political economy innovation studies and development economics for the study of technological upgrading Its distinctive contribution is the development of an innovative theoretical framework named upgrading regimes combining and extending the comparative capitalism and innovation system perspectives It explores the usefulness of this approach by providing an indepth assessment of the political economy of upgrading in Brazil under the Workers Party governments As the politics of technological upgrading will be one of the crucial research areas in the years to come this book promises to become a key reference point in this debate *Sustaining Employment and Wage Gains in Brazil* Joana Silva,Rita

Almeida,Victoria Strokova,2015-08-26 Continued social and economic progress in Brazil will depend on high employment sustained labor productivity and income growth and opportunities for the poor and disadvantaged to upgrade their own productivity and convert it into sustainable incomes **Aging** Noah Berlatsky,2014-04-15 One of the sharpest criticisms within and outside of Hollywood is that it provides no strong beautiful inspirational parts for aging female actors They merely disappear while aging male actors get action hero and older Lothario parts This collection of essays leaves the controversies of Hollywood ageism and sexism behind to look at other cultures and how they treat the aging Readers will examine the effect of aging populations within other societies They will evaluate policy solutions and attitudes They will also learn about health issues in relation to aging Readers will learn from Europe China Japan and several other cultures about their viewpoints on aging *Aging in World History* David G. Troyansky,2015-10-05 In *Aging in World History* David G Troyansky

presents the first global history of aging At a time when demographic aging has become a source of worldwide concern and more people are reaching an advanced age than ever before the history of old age helps us understand how we arrived at the treatment of aging in the modern world This concise volume expands that history beyond the West to show how attitudes toward aging the experiences of the aged and relevant demographic patterns have varied and coalesced over time and across the world From the ancient world to the present this book introduces students and general readers to the history of aging on two levels the experience of individual men and women and the transformation of populations With its attention to cultural traditions medicalization decades of historical scholarship and current gerontology *Aging in World History* is the perfect starting point for an exploration of this increasingly universal aspect of human experience *Fiscal Challenges of*

Population Aging in Brazil Mr.Alfredo Cuevas,Ms.Izabela Karpowicz,Mr.Carlos Mulas-Granados,Mauricio Soto,2017-04-26 In recent decades population has been aging fast in Brazil while old age pensions and healthrelated spending have increased As the population ages the spending trend threaten to reach unsustainable levels absent reforms Increasing the retirement age is key but by itself will not provide sufficient savings to close the pension system financing gap and reforms reducing replacement rates are necessary In the area of health there is scope for improving expenditure efficiency by strengthening outpatient care and regional networks and developing clinical guidelines for cost effective treatments and drugs Reforms are

urgent so that they can be gradual Global Monitoring Report 2015/2016 World Bank;International Monetary Fund,2015-11-02 The Global Monitoring Report 2015 2016 produced by the World Bank Group in partnership with the International Monetary Fund comes at an inflection point in both the setting of global development goals and the demographic trends affecting those goals This year marks the end of the Millennium Development Goals MDGs and the launching of the Sustainable Development Goals SDGs while the World Bank Group has in parallel articulated the twin goals of sustainably ending extreme poverty and sharing prosperity This report presents the latest global poverty numbers based on the 2011 purchasing power parity PPP data and examines the pace of development progress through the lens of the evolving global development goals The special theme of this year s report examines the complex interaction between demographic change and development With the number of children approaching a global ceiling of two billion the world s population is growing slower It is also aging faster with the share of people of working age starting a decline in 2013 But the direction and pace of these trends vary starkly across countries with sizeable demographic disparities between centers of global poverty marked by high fertility and drivers of global growth marked by rapid aging These demographic disparities are expected to deeply affect the pursuit of the post 2015 agenda accentuating existing challenges and creating new opportunities **Brazil** Michael Reid,2014-05-27 Examines the South American country that is destined to be one of the world s premier economic powers by the year 2030 and considers some of the abundant problems the nation faces

development program Rio Rural under the state secretary for agriculture and animal husbandry as well as invited scientists from Brazilian universities and research institutes It bridges existing gaps between science policies and practice in rural development

Achieving World-Class Education in Brazil Barbara Bruns, David Evans, Javier Luque, 2011-11-03 Over the past 15 years Brazil has introduced a consistent program of reforms of its education system progressively aligning the educational attainment of its labor force with that of other middle income countries and introducing advanced student assessment and monitoring systems

Twenty Years of Health System Reform in Brazil Michele Gagnolati, Magnus Lindelow, Bernard Couttolenc, 2013-07-18 It has been over twenty years since the Brazilian Sistema nico de Sa de Unified Health System or SUS was formally established by the 1988 Constitution The impetus for the SUS came in part from rising costs and a crisis in the social security system that preceded the reforms but also from a broad based political movement calling for democratization and improved social rights Building on reforms that started in the 1980s the SUS was based on three overarching principles i universal access to health services with health defined as a citizen s right and an obligation of the state ii equality of access to health care and iii integrality comprehensiveness and continuity of care along with several other guiding ideas including decentralization increased participation and evidence based prioritization The SUS reform established health a fundamental right and duty of the state and started a process of fundamentally transforming Brazil s health system to achieve this goal So what has been achieved since the SUS was established And what challenges remain in achieving the goals that were established in 1988 These questions are the focus of this report Specifically it seeks to assess whether the SUS reforms have managed to transform the health system as envisaged more than 20 years ago and whether the reforms have led to improved outcomes in terms of access to services financial protection and health status Any effort to assess the performance of a health system runs into a host of challenges concerning the definition of boundaries of the health system the outcomes that the assessment should focus on data sources and quality and the role of policies and reforms in understanding how the performance of the health system has changed over time Building on an extensive literature on health system assessment this report is based on a simple framework that specifies a set of health system building blocks which affect a number of intermediate outcomes such as access quality and efficiency which in turn contribute to final outcomes including health status financial protection and satisfaction Based on this framework the report starts by looking at how key building blocks of Brazil s health system have changed over time and then moves on to review performance in terms of intermediate and final outcomes

When We're Sixty-Four Rafael Rofman, Ignacio Apella, 2020-10-23 Latin American countries are in the midst of a demographic transition and as a consequence a population aging process Over the next few decades the number of children will decline relative to the number of older adults Population aging is the result of a slow but sustained reduction in mortality rates given increases in life expectancy and fertility These trends reflect welcome long term improvements in welfare and in economic and social development But this process also entails policy challenges many public

institutions including education health and pension systems and labor market regulations are designed for a different demographic context and will need to be adapted When We re Sixty Four discusses public policies aimed at overcoming the two main challenges facing Latin American countries concerning the changing demographics On one hand older populations demand more fiscal resources for social services such as health long term care and pensions On the other population aging produces shifts in the proportion of the population that is working age which may affect long term economic growth Aging societies risk losing dynamism being exposed to higher dependency rates and experiencing lower savings rates Nonetheless in the interim Latin American countries have a demographic opportunity a temporary decline in dependency rates creates a period in which the share of the working age population with its associated saving capacity is at its highest levels This constitutes a great opportunity in the short term because the higher savings may result in increases in capital endowment per worker and productivity For that to happen it is necessary to generate institutional financial and fiscal conditions that promote larger savings and investment accelerating per capita economic growth in a sustainable way Growing Pains Valentina Flamini,Misael Galdamez,Frederic Lambert,Mike Li,Mr.Bogdan Lissovolik,Rosalind Mowatt,Jaume Puig,Mr.Alexander D Klemm,Mauricio Soto,Mr.Saji Thomas,Christoph Freudenberg,Anna Orthofer,Andrea Herrera,2018-04-05 This paper estimates the fiscal costs of population aging in Latin America and provides policy recommendations on reforms needed to make these costs manageable Although Latin American societies are still younger than most advanced economies like other emerging markets the region is already in a process of population aging that is expected to accelerate in the remainder of the century This will directly affect fiscal sustainability by putting pressure on public pension and health care systems in the region that are already more burdened than for example in emerging Asia a region with a similar demographic structure A stylized cross country exercise drawing on demographic projections from the United Nations and methodologies developed by the IMF to derive public spending projections is used to quantify long term fiscal gaps generated by population aging in 18 Latin American countries 1 Several aspects of current pensions and health care systems in Latin America make the region's long term fiscal positions particularly vulnerable to population aging

Education and Training for the Oil and Gas Industry: The Evolution of Four Energy Nations Phil Andrews,Jim Playfoot,Simon Augustus,2015-05-09 The third book in the Getenergy Guides series The Evolution of Four Energy Nations considers how four very different countries have evolved as oil and gas producing nations and how the interventions of government industry and the education and training sector have addressed workforce and skills development challenges in each of these countries This volume will explore in each case the historical growth of the industry the dynamics of the industry today and the projected direction of travel for the industry in the future Within this context the volume will examine the nature of the skills and workforce demands that each country has experienced and will analyze the influence of policy initiatives including those related to the establishment and running of national oil companies the impact of industry activities

and the role of education and training providers Each of these four extended case studies will reveal what we can learn from past and recent experiences The case studies will also explore the extent to which the effectiveness of approaches to skills and workforce development within the oil and gas industry are contextual and what commonalities there are in terms of success factors The Guide will conclude with a set of observations regarding best and worst practices that can inform future interventions in hydrocarbon producing nations across the world Multi authored by Getenergy s principal collaborators who collectively have more than 100 years of experience in the oil and gas industry Includes full color images to underscore key concepts Focuses on knowledge transfer from experienced oil gas professionals to national staff Utilizes specific case studies from Mexico Nigeria Brazil and Iraq to illustrate various approaches to evolution as an oil and gas producing nation

Shared Prosperity and Poverty Eradication in Latin America and the Caribbean Louise Cord,MarÃa Genoni,Carlos RodrÃguez-CastelÃn,2015-06-18 Over the last decade Latin America and the Caribbean region has achieved important progress towards the World Bank Group s goals of eradicating extreme poverty and boosting income growth of the bottom 40 percent propelled by remarkable economic growth and falling income inequality Despite this impressive performance social progress has not been uniform over this period and certain countries subregions and even socioeconomic groups participated less in the growth process As of today more than 75 million people still live in extreme poverty in the region using 2 50 day capita half of them in Brazil and Mexico and extreme poverty rates top 40 percent in Guatemala and reach nearly 60 percent in Haiti This means that extreme poverty is still an important issue in both low and middle income countries in the region As growth wanes and progress in reducing the still high levels of inequality in the region slows it will be more important than ever for governments to focus policies on inclusive growth The book includes an overview that highlights progress towards the goals of poverty eradication and shared prosperity between 2003 and 2012 unpacks recent gains at the household level using an income based asset model and examines some of the policy levers used to affect social outcomes in the region It draws on 13 country studies eight of which are featured in this volume Argentina Brazil Colombia El Salvador Mexico Paraguay Peru and Uruguay The other case studies include Bolivia Chile Dominican Republic Ecuador and Honduras which will be included in the web version of the book
