1840 Deirdre McCloskey, 2013-11-05 These unique papers were originally read at a conference on the new economic history

of Britain at Harvard in 1970 and each is accompanied by a summary of the discussion that followed it The participants of the conference represented a broad range of scholars from both sides of the Atlantic The first eleven papers deal with a variety of topics covering a period from 1840 to the 1920s They focus on the performance of the British economy and especially its businessmen during the time of Britain's industrial maturity and relative decline The papers and discussions reached a novel conclusion the contrary to commonly held opinion the British economy performed well and that British businessmen were not lacking in entrepreneurial vigour compared with their German or American counterparts But even more important for British historiography than this finding was the demonstration that economic and statistical methods can be applied successfully to the study of economic history The papers in the concluding section discuss the origins and development of the new economic history and show that as a substantial supplement to work along more traditional lines its methods and application are both desirable and possible This collection serves as an interesting report of research into a key period in British history and also as a useful introductory account of the new economic history in the United Kingdom This book was first published in 1971

Hooked on Growth Douglas E. Booth, 2004-05-03 Challenging conventional wisdom on the virtues of a consumer economy this provocative book explores the nexus between growth and environment sustainability The miracle of the modern affluent economy is an ever swelling cornucopia of consumer goods leading to expanding consumption as the essential underpinning of economic growth in more and more parts of the globe Douglas Booth contends that expansion in this form amounts to an addiction Are we as a society hooked on economic growth of a kind that carries with it significant threats to the natural environment A critical dilemma for the modern economy is that growth is required to prevent the pain of unemployment As growth continues the environment declines but if growth slows unemployment rises We seem trapped in a spiraling predicament like that of the addict This accessible work explores whether getting unhooked from growth to meet the needs of the environment is possible Giving the environment priority over growth may seem to some like a radical idea yet the author argues that it can be accomplished using marketable emissions allowances transferable development rights and other tools popular with conventional economists It can also be achieved by creating more interesting and environmentally friendly urban landscapes less beholden to the automobile The key problem a less growth oriented society will face is ensuring that everyone who wants employment can find it This will require something that many people wish for anyway a shorter workweek More leisure a higher quality environment and more attractive cities and towns are the potential rewards of a less consumption oriented society Yet powerful economic interests that benefit from a high growth economy are arrayed against changes in the status quo Under what circumstances can the power of special interests be overcome in the name of environmental conservation This is the author's critical final question as he offers a clear path to a sustainable economic and environmental future

A History of Financial Crises Cihan Bilginsoy, 2014-11-27 Once in a lifetime financial crises have been a recurrent part of life in the last three decades It is no longer possible to dismiss or ignore them as

aberrations in an otherwise well functioning system Nor are they peculiar to recent times Going back in history asset price bubbles and bank runs have been an endemic feature of the capitalist system over the last four centuries The historical record offers a treasure trove of experience that may shed light on how and why financial crises happen and what can be done to avoid them provided we are willing to learn from history This book interweaves historical accounts with competing economic crisis theories and reveals why commentaries are often contradictory First it presents a series of episodes from tulip mania in the 17th century to the subprime mortgage meltdown In order to tease out their commonalities and differences it describes political economic and social backgrounds identifies the primary actors and institutions and explores the mechanisms behind the asset price bubbles crashes and bank runs Second it starts with basic economic concepts and builds five competing theoretical approaches to understanding financial crises Competing theoretical standpoints offer different interpretations of the same event and draw dissimilar policy implications This book analyses divergent interpretations of the historical record in relation to how markets function the significance of market imperfections economic decision making process the role of the government and evolutionary dynamics of the capitalist system Its diverse theoretical and historical content of this book complements economics history and political science curriculum **Essays on a Mature Economy** Deirdre McCloskey, 2005-11-03 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company

The Market in History (Routledge Revivals) A.J.H. Latham, B L Anderson, 2016-04-06 First published in 1986 The free market is often associated with liberty and individualism and this connection has been made for more centuries than is generally realised This essays collected in this book trace the development importance and influence of the market as a dominating component of the shared human life from classical antiquity to the present The authors from various backgrounds keep constantly in view the moral and political questions raised by the role of markets as well as laying out succinctly what can be known or deduced about the actual operation of the market in Western and other cultures This book will be of interest to students of economics and history *The Future of Economics* Alexander J. Field, 2020-03-10 Originally published under the title *The Future of Economic History* this book attempts to chart a new course for the intellectual discipline known as economic history and determine its contributions to the study of economics The authors suggest new and potentially fruitful areas and approaches for research and at the same time analyze the weaknesses in past efforts to chart a course for the future **Lives of the Laureates, seventh edition** Roger W. Spencer, David A. Macpherson, 2020-06-23 Autobiographical accounts by Nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process with six new laureates *Lives of the Laureates* offers readers an informal history of modern economic thought as told through autobiographical essays by thirty two Nobel Prize laureates in economics The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity The accounts are accessible and engaging achieving clarity without sacrificing inherently difficult content This seventh edition

adds six Nobelists to its pages Roger B Myerson co recipient in 2007 describes his evolution as a game theorist and his application of game theory to issues that ranged from electoral systems to perverse incentives Thomas J Sargent co recipient in 2011 recounts the development of the rational expectations model which fundamentally changed the policy implications for macroeconomic models Amartya Sen recipient in 1998 reflects on his use of a bicycle later donated to the Nobel Museum to collect data early in his career A Michael Spence co recipient in 2001 describes among other things his whiplash inducing first foray into teaching an undergraduate class Christopher A Sims co recipient in 2011 discusses his non Nobel research and Alvin E Roth co recipient in 2012 chronicles the three insurrections he has witnessed in mainstream economics Lives of the Laureates grows out of a continuing lecture series at Trinity University in San Antonio which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms The Laureates W Arthur Lewis Lawrence R Klein Kenneth J Arrow Paul A Samuelson Milton Friedman George J Stigler James Tobin Franco Modigliani James M Buchanan Robert M Solow William F Sharpe Ronald H Coase Douglass C North John C Harsanyi Myron S Scholes Gary S Becker Robert E Lucas Jr Vernon L Smith Clive W J Granger Edward C Prescott Thomas C Schelling Edmund S Phelps Eric S Maskin Joseph E Stiglitz Paul Krugman Peter A Diamond Roger B Myerson Thomas J Sargent Amartya Sen A Michael Spence Christopher A Sims Alvin E Roth

Lives of the Laureates, sixth edition Roger W. Spencer, David A. Macpherson, 2014-12-05 Autobiographical accounts by Nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process Lives of the Laureates offers readers an informal history of modern economic thought as told through autobiographical essays by twenty three Nobel Prize laureates in Economics The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity The accounts are accessible and engaging achieving clarity without sacrificing inherently difficult content This sixth edition adds four recent Nobelists to its pages Eric Maskin who illustrates his explanation of mechanism design with an example involving a mother a cake and two children Joseph Stiglitz who recounts his field's ideological wars linked to policy disputes Paul Krugman who describes the insights he gained from studying the model of the Capitol Hill Babysitting Coop and the recession it suffered when more people wanted to accumulate babysitting coupons than redeem them and Peter Diamond who maps his development from student to teacher to policy analyst Lives of the Laureates grows out of a continuing lecture series at Trinity University in San Antonio which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms These lectures demonstrate the richness and diversity of contemporary economic thought The reader will find that paths cross in unexpected ways that disparate thinkers were often influenced by the same teachers and that luck as well as hard work plays a role in the process of scientific discovery The Laureates Lawrence R Klein Kenneth J Arrow Paul A Samuelson Milton Friedman George J Stigler James Tobin Franco Modigliani James M Buchanan Robert M Solow William F Sharpe

Grossman,2020-05-26 A sweeping look at the evolution of commercial banks over the past two centuries Commercial banks are among the oldest and most familiar financial institutions When they work well we hardly notice when they do not we rail against them What are the historical forces that have shaped the modern banking system In *Unsettled Account* Richard Grossman takes the first truly comparative look at the development of commercial banking systems over the past two centuries in Western Europe the United States Canada Japan and Australia Grossman focuses on four major elements that have contributed to banking evolution crises bailouts mergers and regulations He explores where banking crises come from and why certain banking systems are more resistant to crises than others how governments and financial systems respond to crises why merger movements suddenly take off and what motivates governments to regulate banks Grossman reveals that many of the same components underlying the history of banking evolution are at work today The recent subprime mortgage crisis had its origins like many earlier banking crises in a boom bust economic cycle Grossman finds that important historical elements are also at play in modern bailouts merger movements and regulatory reforms *Unsettled Account* is a fascinating and informative must read for anyone who wants to understand how the modern commercial banking system came to be where it is headed and how its development will affect global economic growth

Imagined Histories Anthony Molho,Gordon S. Wood,2018-06-05 This collection of essays by twenty one distinguished American historians reflects on a peculiarly American way of imagining the past At a time when history writing has changed dramatically the authors discuss the birth and evolution of historiography in this country from its origins in the late nineteenth century through its present more cosmopolitan character In the book s first part concerning recent historiography are chapters on exceptionalism gender economic history social theory race and immigration and multiculturalism Authors are Daniel Rodgers Linda Kerber Naomi Lamoreaux Dorothy Ross Thomas Holt and Philip Gleason The three American centuries are discussed in the second part with chapters by Gordon Wood George Fredrickson and James Patterson The third part is a chronological survey of non American histories including that of Western civilization ancient history the middle ages early modern and modern Europe Russia and Asia Contributors are Eugen Weber Richard Saller Gabrielle Spiegel Anthony Molho Philip Benedict Richard Kagan Keith Baker Joseph Zizak Volker Berghahn Charles Maier Martin Malia and Carol Gluck Together these scholars reveal the unique perspective American historians have brought to the past of their own nation as well as that of the world Formerly writing from a conviction that America had a singular destiny American historians have gradually come to share viewpoints of historians in other countries about which they write The result is the virtual disappearance of what was a distinctive American voice That voice is the subject of this book [The Cambridge Economic History of Europe](#) Michael Moïsssey Postan,H. Dynamics of Agricultural Change David Grigg, 2019-08-06 First published in 1982 Until the nineteenth century the history of agriculture was the history of mankind but it has not perhaps received the wide attention that this importance justifies In this study the author reviews for the student of agricultural history successive attempts to describe and explain agricultural changes that are not specific to a limited area or a particular time In a sense *The Dynamics of Agricultural Change* is a systematic historical geography of agriculture Some of the models the author explores have been developed within agricultural history some drawn from other disciplines can be applied fruitfully to it What is the relationship between population growth and agricultural development Between environmental changes and those in agriculture What was the effect of the industrial revolution And has there been an agricultural revolution This book suggests to university students of economic history historical geography and agriculture a number of stimulating ways of interpreting and reinterpreting agricultural history

Liberal Dreams and Nature's Limits James T. Lemon, 2008-05-14 On the agricultural frontier and through technological progress Europeans and others and their descendants have sought to fulfill their dreams of improvement Through businesses governments and other bodies city dwellers expedited these desires by organizing settlements communications trade finance and manufacturing In turn cities grew mightily To assess the present condition of cities *Liberal Dreams and Nature's Limits* focuses on five large North American cities at various times in the past Philadelphia about 1760 New York 1860 Chicago 1910 Los Angeles 1950 and Toronto 1975 Life inside these cities specifically the economy society and politics public services land development and the geographies of circulation workplaces and residential districts is the central concern of this book Another concern is drawing contrasts and similarities between the American and Canadian urban experiences North Americans most now living in cities face the challenge of a social frontier how to maintain civility in a near stagnant economy Despite recent advances in cyberspace nature has imposed limits on technical progress defined by speed convenience and comfort Promethean gains through creative destruction are no longer possible Increased preoccupation with money status and safety suggests that the striving inspired by liberalism is still appealing Yet without growth liberal dreams cannot be fulfilled To ensure work income equity and a degree of freedom in thought and action citizens and leaders in both countries will have to commit themselves as never before to managing fairness through social democracy Sustainable cities are not possible otherwise
