Grondbeginselen Der Sociologie:

Grondbeginselen der sociologie H. de Jager, 1994 **Grondbeginselen der sociologie** H. de Jager, de Jager (H.), Albert Louis Mok, 1983 *Social Mobility of Ethnic Minorities in the Netherlands* Artwell Cain, 2007 Artwell Cain analyses the factors that have been conducive to the upward mobility of ethnic minorities in The Netherlands Because this topic has not been studied Cain s research has great relevance for both policy makers and social scientists Moreover the study adopts a distinctive perspective by focussing on the factors that have generated the professional success of ethnic minorities Cain s study scrutinises the theoretical debate on class and ethnicity and its relevance for processes of upward social mobility At the same time it is grounded in empirical research taking class analysis as its theoretical point of departure and investigating what the influence of factors as higher educational level talent attitude and hard work in addition to other factors such as social class ethnicity gender and racial discrimination were part of the upward mobility processes of ethnic minorities Cain also looks at the role of diversity policy in the organisations in which the respondents are employed and inquires whether this policy affected their chances for upward mobility Among the features taken into consideration are the distance travelled between the respondents social class origins and their present social position their ethnic identification which colours their social networks and subsequently the effectiveness of these networks and their unique perspective on exclusionary factors in organisations *On the Economic Identification of Social Classes* Guglielmo Carchedi, 2023-02-15 First published in 1977 On the Economic Identification of Social Classes centres around the economic identification the definition in terms of production relations of social classes focussing on the developed capitalist countries The basic stages of capitalist development are considered with special emphasis on monopoly capitalism The book includes a detailed analysis of the functional element of the capitalist production relations the identification in terms of production and distribution relations of the new middle class under monopoly capitalism and the analysis of the process of proletarianism of this class New theoretical concepts of position devaluation of labour power through dequalification of positions and of capitalist and non capitalist state activities are developed to further the discussions which although fresh in approach are immersed in the complex texture of Marxist thought This book will be of interest to students of economics and sociology Conflict in the Miracle Stories Evert-Jan Vledder, 1997-10-01 Matthew s Gospel is a witness to conflicting interests The leaders of Israel are part of the so called retainer class who pursue their own interests by promoting the interests of the Roman rulers Jesus and the Matthaean community on the contrary acts on behalf of the marginalized in society Jesus challenges the underlying values of the leaders who contrary to what is expected do not forgive and act mercifully The leaders try to resolve the conflict negatively by labelling Jesus as possessed by the devil At the same time the conflict spirals onward the Matthaean community is called to act in the interests of the marginalized It is Vledder s special contribution to Matthaean study that he brings to light the underlying dynamics of this conflict in a stimulating sociological study *How People Get Lost in Organizations*

Martijn van Oorschot, Michiel Hogerhuis, 2006 **Grondbeginselen der sociologie** Hugo Jager, Albert Louis Mok, G. Sipkema, 2009 **Religious Involvement in Hearing Sermons** Theo Pleizier, 2010 **Ethics and the politics of food** Matthias Kaiser, Marianne Elisabeth Lien, 2023-08-28 Food has emerged as a political topic par excellence. It is increasingly involved in controversies at a transnational level in relation to issues of access, dominance, trade and control in a shared global environment. At the same time, innovations in biotechnology and animal domestication have brought ethics to the forefront of food debates. Thus we live in an era when the ethics and the politics of food must come together. This book addresses the ethics and the politics of food from a broad range of academic disciplines including sociology, philosophy, nutrition, anthropology, ethics, political science and history. The chapters expose novel problem areas and suggest guidelines for approaching them. Topics range from fundamental issues in philosophy to sustainability, from consumer trust in food to ethical toolkits. Transparency, power and responsibility are key concerns and special attention is given to animal welfare, emerging technologies in food production and marine domestication. Together the chapters represent a wide range of academic responses to the fundamental dilemmas posed by food production and food consumption in the contemporary world.

Spiritual Care in a Hospital Setting Wim Smeets, 2006-10-01 This book reports on a theoretical and empirical study of spiritual care as a profession in health care, particularly from the angle of quality care. Theoretically, the central issues in spiritual care are analysed: quality care, medicalisation and contingency as it limits the function of worldviews in health care, personal identity, legitimacy and position in health care, goals and tasks of the profession. Specific attention is spent to the determinants of the goals in the interaction with patients. Empirically, the attitudes of Dutch spiritual caregivers towards these issues are investigated. The book provides insight into the professional discipline of spiritual care and discusses some challenges for the future: the intrinsic meaning of the plurality of worldviews within spiritual care, the institutional aspects of this spiritual care and the educational implications of spiritual care as a professional discipline. The book is particularly useful for spiritual caregivers in their reflection on their practice and for education of future spiritual caregivers.

Communication for Rural Innovation Cees Leeuwis, 2013-04-30 This important book is the re-titled third edition of the extremely well received and widely used *Agricultural Extension* van den Ban Hawkins 1988/1996. Building on the previous editions, *Communication for Rural Innovation* maintains and adapts the insights and conceptual models of value today while reflecting many new ideas, angles and modes of thinking concerning how agricultural extension is taught and carried through today. Since the previous edition of the book, the number and type of organisations that apply communicative strategies to foster change and development in agriculture and resource management has become much more varied and this book is aimed at those who use communication to facilitate change in agriculture and resource management. *Communication for Rural Innovation* is essential reading for process facilitators, communication division personnel, knowledge managers, training officers, consultants, policy makers, extension specialists and managers of agricultural extension or research organisations. The

book can also be used as an advanced introduction into issues of communicative intervention at BSc or MSc level *The Kingdom in the Republic* Lucie Bardiau-Huys, 2006-06 Two observations initiated this study the statistical fact that today less than 1% of the French population are evangelical Christians despite centuries of Christianity present in France and multiplied missionary efforts in the twentieth century and the obvious lack of missiological studies about these poor results and the particularities of secularist France as mission field A preliminary research project survey concerning communication and relations in French churches indicated the existence of a specific French mindset An investigation of the place of religion throughout history and a sociological analysis of today's values and self image in France provided insight into the French collective identity This identity compared to a relational approach of the New Testament Christian identity led to the identification of conflict zones Among the different possibilities for handling the conflict the incarnational ministry model was withheld This study concludes with the proposal of a six principle framework for a church growth inducing approach that takes into account the cultural specificities of the French mission field The Professional Teacher Educator Mieke Lunenberg, Jurriën Dengerink, Fred Korthagen, 2014-04-03 This book is a review of more than twenty years of international research on teacher educators It offers a solid overview of what is known about the professional roles professional behaviour and professional development of teacher educators A systematic analysis of the focus methods and data sources of 137 key publications on teacher educators make this book into an important reference work for everyone interested in the work of and research on teacher educators There is a growing consensus that teacher educators largely determine the quality of teachers and hence the quality of education Through this book Lunenberg Dengerink and Korthagen provide not only insights into the various roles of teacher educators and the complexity of their work but they also discuss building blocks for ongoing structured and in depth professional development The authors clarify that if we wish to take being a teacher educator seriously it is imperative that we build our understanding on research data The book shows that although the number of studies on teacher educators is growing the research in this field is still scattered The authors highlight the need to create a coherent research programme on teacher educators and provide concrete suggestions for such a programme **Monitoring Public Perception of Organisations** Marita Vos, H. Schoemaker, 2006 This book enhances understanding of organizational reputation and image It provides a measurement method and explains the scientific background **Basisverpleegkunde** J. A. M.
