Groundworks Narratives Of Embodiment:

Groundworks Don Johnson,1997 *Groundworks* Don Hanlon Johnson,1997-04-24 Groundworks gives accounts of the actual processes of working with individuals in six major schools of Somatics by either the creator of the method itself or a leading teacher of the method The creators are Robert Hall of Lomi School Bonnie Bainbridge Cohen of Body Mind Centering and Emilie Conrad Daoud of Continuum Leading teachers of methods include Michael Salveson on Roling Elizabeth Beringer on Feldenkrais work and Darcy Elman on F M Alexander Technique Each therapist describes how he or she approaches and diagnoses a patient's problem how he or she determines what and where to work and the progress of a session Each therapist shows the complexity of working with somatic processes and the resulting reward for client and therapist both **Schutzian Research vol. 3 / 2011** Michael Barber,2011-01-01 *The Biological Basis for Mind Body Interactions* E.A. Mayer,C.B. Saper,2000-02-03 The current volume focuses on several key aspects of mind brain body interactions in health and disease including specific examples of interactions between body and brain mechanisms underlying the response of the system to stressors the role of early life events in permanently biasing the responsiveness of the system and practical implications of mind body interactions in human disease The volume on Biological Basis for Mind Body Interactions is organized into 6 major sections each dealing with a unique aspect of the general topic After establishing the relationship between mind brain and emotions the first section deals with general neurobiological aspects mediating the effect of stress on various organ systems including the immune and cardiovascular system The second section covers the topic of how early life stressor can permanently alter responsiveness of the nervous system in animals and in man The third section deals with influences of the internal environment mediated by neuroendocrine and visceral afferent pathways on the CNS The fourth section which deals with influences of body on the brain focuses on mechanisms involved in perception and modulation of pain The fifth section deals with influences of the mind brain on the body with an emphasis on central and peripheral mechanisms of autonomic control of body functions The last section deals with a series of practical issues of mind body treatments including acupuncture breathing body work and meditation In addition issues such as cost effectiveness and research aspects are discussed Authors in this last section frequently refer to topics and mechanisms addressed in the early sections making it a truly integrated volume The unique aspect of the volume is the integration of state of the art research information on biological and practical aspects of mind brain body interactions It is based on the beliefs of the editors and participants that the traditional separation of mind and body in research and in treatment of human disease is obsolete and needs to be replaced with a new unifying paradigm Ironically this evolving paradigm shares many similarities with ancient pre Cartesian paradigms of health and disease *Somatic Movement Dance Therapy* Amanda Williamson,2023-04-20 This book focuses on Somatic Movement Dance Therapy and the importance of self regulation and co regulation The chapters attend to self regulating different tissues through movement breath sound and the imagination Throughout the book the

author shares processes and practices that support participants to balance their living tissues moving from sympathetic arousal into parasympathetic ease and release The study of the autonomic nervous system and how to innervate the parasympathetic through breath awareness heart sensing and interoception is the central through line in the book Uniquely Williamson attends to the anatomical and physiological complexity underlying the apparent simplicity of somatic movement dance practice How to sense perceive and move with attuned awareness of specific body tissues such the skeletal muscular and craniosacral system invites the reader into a deep anatomical and physiological excavation of self regulation The interconnectivity of fascia and the importance of cardioception breath awareness and gravity lie at the heart of this book Sensory perceptual awareness of the heart is foregrounded as the most important ingredient in the efficacy of practice as well as gravi ception soft tissue rolling and fascial unwinding Includes a collective foreword from Sarah Whatley Daniel Deslauriers Celeste Snowber and Karin Rugman This is a must read practice as research book for under and postgraduate students researchers and educators and especially important for practitioners who feel the weight and condescension of the mechanistic paradigm

The Impact of Touch in Dance Movement Psychotherapy Katy Dymoke, 2021-10-22

This book explores the therapeutic use of touch focusing on an in depth case study of work in an NHS setting with a client with learning disabilities and situating this within a wide theoretical context

This is a unique and influential study illustrating the impact of touch in dance movement psychotherapy and laying the ground for a theory on the use of touch in Dance Movement Psychotherapy DMP

The case study illustrates the impact of touch upon the therapeutic relationship with the use of video transcription and descriptive reflexive accounts of the session content

The case analysis sections establish the ground for a paradigm shift and for emergent theory and methods in support of the use of touch in Dance Movement Psychotherapy and other contexts

The role touch takes is beyond its affect which expands our understanding of its potency as an intervention

The writing is embedded in many years of practice led research in the field of dance and somatic practices in particular Body Mind Centering and Contact Improvisation in which touching and being

touched is met with curiosity as a place of insight and revelation beyond the bounds of taboo and social dictat The study considers the philosophical landscape of both touch and non touch This book explores and reflects upon the use of touch considering the wider context and socially imposed perceptions that would prevent touch from taking place including philosophical and social discourses Through telling the story of a client case the book offers a wealth of thought provoking content to inspire continued dialogue Key strengths of this book are the depth warmth and perceptiveness of the case history and the way in which this is successfully linked with theory Particular attention is paid to embodied cognition and exosystemic theory the two leading developments of current thinking With the ethical practical and philosophical content the book will be of interest to psychotherapists health and social care practitioners as well as arts in health practitioners and beneficiaries in educational programs and settings Primary readership will be among DMP psychotherapists body psychotherapists drama therapists Body Mind Centering practitioners arts in health practitioners people working with clients with learning disabilities and any practitioner and researcher interested in understanding the role touch may play in the psychotherapeutic encounter
