Esophageal Function Testing, An Issue of

Gastrointestinal Endoscopy Clinics, E-Book John Pandolfino, 2014-09-26 This issue devoted to Esophageal Function Testing highlights these tests that are complimentary to endoscopy and should be considered after endoscopy is performed. In fact a prerequisite for performing many of these studies is a negative endoscopy and thus the endoscopist should be well informed regarding the indication and utility of these tests. Additionally some of these newer technologies require endoscopy to be performed during the study as the placement or positioning of the measurement tool will require endoscopic landmarks or direct placement. There have been major advances in most of these older techniques and new novel measurement paradigms have been created that allow for a more visual and accurate depiction of physiologic and anatomic data. These technologies have evolved to be more akin to an imaging technique and thus the visual display and data acquisition is much more intuitive and easier to teach to trainees. This review would be of the utmost importance to readers of GI Endoscopy Clinics.

A New History Of Cataract Surgery Christopher T. Leffler, 2025-08-14 Cataract surgery has been the procedure which has almost defined the profession of ophthalmology for millennia. Patients have understood that cataract surgery could transform their lives in an almost miraculous way. Much of the history of this surgery has been handed down to us and on occasion we have inherited some myths along with the facts. In this two volume monograph we sought to uncover the reality behind the myths. This book is entitled A New History of Cataract Surgery because it is based on original research from primary sources. It is the work of 44 co authors from North America, Europe, the Middle East and Asia. It contains new translations from Latin, Greek, Sanskrit, Chinese, Arabic, Persian, French, Dutch and German. It contains photographs from private collections. We sought to tell stories you might have heard a little about from antiquity onward in a new way. Many of the chapters in this book covering the 20th century were written by ophthalmologists who lived through the revolutionary changes in their field and were prime movers in making these advances.
