

SPEAKER PLACEMENT

Proper placement of the speakers is an important step in obtaining the most realistic soundstage possible. These recommendations are for the optimal placement of the loudspeakers. Use these placement recommendations as a guide. Slight

variations will not diminish your listening pleasure. All of the Northridge Series loudspeakers referred to in this guide are video-shielded (except models N24AWII and N26AWII) and can safely be placed near a television.

Note: Model NSP1II includes four N24II speakers and one N-CENTERII speaker. For a complete home theater speaker system, add a JBL powered subwoofer to this model.

MODELS: N24II, N24AWII, N26AWII

As Front Speakers

As Surround Speakers

Note for all-weather models: While the N24AWII and N26AWII are weather-resistant, they are not designed to be immersed in water. Be selective in your outdoor placement. Placing these speakers under roof eaves or a patio awning will offer some shelter and help contribute to years of trouble-free performance. When installed outdoors, the speakers should be angled down slightly, using the mounting brackets that are included with models N24II and N24AWII. See your JBL dealer for the optional brackets (W5N25WHIT) available for model N26AWII.
