

The dipper will move within its limits for as long as you hold the joystick forward or backwards. It will stop automatically when you release the joystick.

To move the dipper outwards, move the joystick forwards (position 2).

To move the dipper inwards, move the joystick backwards (position 1).

The bucket will move within its limits for as long as you hold the joystick to one side. It will stop automatically when you release the joystick.

To fill the bucket, move the joystick to the left (position 3).

To empty the bucket, move the joystick to the right (position 4).

Press the power switch for power boost.

#### Left Joystick

The left hand joystick controls the slew of the superstructure and the movements of the boom. When released, the joystick returns to the neutral position.

The superstructure will slew within its limits for as long as you hold the joystick over to one side. It will stop automatically when you release the joystick.

When the joystick is returned to neutral, the machine will still not stop moving immediately because of inertia. Remember this when you do a swing operation. The operation of the bucket attachment is reversed when it is fitted in the reverse position, be careful.

To move the dipper outwards, move the joystick to the left (position 1).

To move the dipper inwards, move the joystick to the right (position 2).
