Jean Luc Nancy And The Question Of Community Bloomsbury Studies In Continental Philos:

Jean-Luc Nancy and the Question of Community Ignaas Devisch, 2013-05-23 This book remedies a gap in the ongoing debate on community by a transparent and thorough analysis of the work of French philosopher Jean Luc Nancy

Merleau-Ponty's Existential Phenomenology and the Realization of Philosophy Bryan A. Smyth, 2013-12-19 Bringing to light the essential philosophical role of Marxism within Merleau Ponty's reinterpretation of transcendental phenomenology this book shows that the realization of this project hinges methodologically upon a renewed conception of the proletariat qua universal class specifically that it rests upon a humanist myth of incarnation which substantiated by Merleau Ponty's notion of heroism locates an objective historical purposiveness in the habituated organism of the modern subject Foregrounding the phenomenological priority of history over corporeality in this way Smyth's analysis recovers the militant character of Merleau Ponty's existential phenomenology It thus sheds critical new light on his early thought and challenges some of the main parameters of existing scholarship by disclosing the intrinsic normativity of his basic methodological commitments *The*

Poetic Imagination in Heidegger and Schelling Christopher Yates, 2013-08-15 The imagination is a decisive if underappreciated theme in German thought since Kant In this rigorous historical and textual analysis Christopher Yates challenges an oversight of traditional readings by presenting the first comparative study of F W J Schelling and Martin Heidegger on this theme By investigating the importance of the imagination in the thought of Schelling and Heidegger Yates study argues that Heidegger's later more poetic philosophy cannot be understood properly without appreciating Schelling's central importance for him A key figure in post Kantian German Idealism Schelling's penetrating attention to the creative character of thought remains undervalued Capturing the essential manner in which Heidegger's ontology and Schelling's idealism intersect *The Poetic Imagination in Heidegger and Schelling* likewise presents an introduction to better understanding Heidegger's later thought It reveals how his engagement with Schelling encouraged Heidegger to recover and refine the imagination as a poetic as opposed to reductive and dogmatic collaborator in the life of truth Tracing the theme of imagination in new readings of these major thinkers Yates study not only acknowledges Schelling's provocative place in post Kantian German Idealism but demonstrates as well the significance of Schelling's philosophical focus and style for Heidegger's own concentration on the creative vocation of human artistry and thought **Breathing with Luce Irigaray** Lenart

Skof, Emily A. Holmes, 2013-08-15 Contributors to this volume consider the implications of the Age of Breath a spiritual shift in human awareness to the needs of the other figured through breathing Awareness of the breath allows us to attend to our bodies and the bodies of others to animals nature other cultures oppressed minorities and the other of sexual difference As a way to connect body and spirit self and other nature and culture and East and West breathing emerges as the significant theological and philosophical gesture of our time Philosophy has too often cut off metaphysical thought from this living breathing world with its animal and female bodies just as religious traditions have repressed the breathing flesh in favour of

calcified word The re introduction of breath into philosophy and theology draws our awareness back to the body to respect for the other and to nature making awareness of the breath essential for an embodied ethics of difference in our globalized ecological age These themes are addressed by an international team of scholars including Luce Irigaray *Nietzsche and Political Thought* Keith Ansell Pearson, 2013-11-21 Nietzsche challenges the tenets of received political wisdom in a number of ways and his thinking contains resources for revitalising political thinking Nietzsche and Political Thought offers fresh insights into Nietzsche's relevance for contemporary political thought in light of recent advances in research in the field and key topics in contemporary theorising about politics An international team of leading scholars provide vital new perspectives on both core and novel topics including justice democratic theory biopolitics the multitude political psychology and the Enlightenment In spite of the controversies what becomes clear is that Nietzsche is vital for political thought and a more sensitive and nuanced approach than conventional understandings allow is required Nietzsche continues to have a lively presence in contemporary philosophy and this book reawakens interest in the political dimension of his thinking *Towards the Critique of Violence* Brendan Moran, Carlo Salzani, 2015-08-27 In the past two and a half decades Walter Benjamin's early essay *Towards the Critique of Violence* 1921 has taken a central place in politico philosophic debates The complexity and perhaps even the occasional obscurity of Benjamin's text have undoubtedly contributed to the diversity conflict and richness of contemporary readings Interest has heightened following the attention that philosophers such as Jacques Derrida and Giorgio Agamben have devoted to it Agamben's own interest started early in his career with his 1970 essay *On the Limits of Violence* and Benjamin's essay continues to be a fundamental reference in Agamben's work Written by internationally recognized scholars *Towards the Critique of Violence* is the first book to explore politico philosophic implications of Benjamin's *Critique of Violence* and correlative implications of Benjamin's resonance in Agamben's writings Topics of this collection include mythic violence the techniques of non violent conflict resolution ambiguity destiny or fate decision and nature and the relation between justice and thinking The volume explores Agamben's usage of certain Benjaminian themes such as Judaism and law bare life sacrifice and Kantian experience culminating with the English translation of Agamben's *On the Limits of Violence* *Ernst Bloch and His Contemporaries* Ivan Boldyrev, 2014-02-27 Ernst Bloch and His Contemporaries is a much needed concise yet comprehensive overview of Ernst Bloch's early and later thought It fills an important gap in research on the history of German thought in the 20th century by reconstructing the contexts of Bloch's philosophy while focusing on his contemporaries Georg Lukács Walter Benjamin and Theodor Adorno Ernst Bloch's influential ideas include his theory of utopian consciousness his resolute inclination to merge aesthetics and politics rehabilitation of hope and atheistic conception of Christianity Although Bloch's major early texts *Spirit of Utopia* and *Traces* have recently been translated into English and there has been renewed interest in Bloch over the last 15 years he is still relatively unknown compared to other left German Jewish intellectuals Ivan Boldyrev places Bloch's often enigmatic prose within contexts more familiar to English

speaking readers and outlines the most important messages in Bloch's legacy still relevant today to European intellectual discourse in particular aesthetics and philosophy of history Deleuze and Art Anne Sauvagnargues, 2013-08-15 In Deleuze and Art Anne Sauvagnargues one of the world's most renowned Deleuze scholars offers a unique insight into the constitutive role played by art in the formation of Deleuze's thought By reproducing Deleuze's social and intellectual references Sauvagnargues is able to construct a precise map of the totality of Deleuze's work pinpointing where key Deleuzian concepts first emerge and eventually disappear This innovative methodology which Sauvagnargues calls periodization provides a systematic historiography of Deleuze's philosophy that remains faithful to his affirmation of the principle of exteriority By analyzing the external relations between Deleuze's self-proclaimed three philosophical periods Sauvagnargues gives the reader an inside look into the conceptual and artistic landscape that surrounded Deleuze and the creation of his philosophy With extreme clarity and precision Sauvagnargues provides an important glimpse into Deleuze's philosophy by reconstructing the social and intellectual contexts that contributed to the trajectory of his thought This book is the product of insightful and careful research which has not been made available to English readers of Deleuze before now Nietzsche's Therapeutic Teaching Horst Hutter, Eli Friedland, 2013-09-21 The theme of the philosopher as therapist dominates Nietzsche's entire opus from his earliest writings to the Zarathustra period and beyond Nietzsche wishes to hasten the coming and future sanctification of a new type of synthetic human being and his entire teaching is shaped by his own struggles against illness Yet few Nietzsche scholars have paid this crucial therapeutic element of his thought sufficient attention This collection of essays by leading scholars in the field is composed around the Nietzschean insight which has its roots in the Hippocratic tradition of ancient medicine that beliefs behaviours ideals and patterns of striving are not things for which individuals or even cultures are responsible Rather they are symptoms of what an individual or culture is which symptoms require diagnostic interpretation and evaluation The book identifies three principal approaches in Nietzsche's philosophy diagnostic prognostic and therapeutic Each essay takes up this essential insight into Nietzsche's therapeutic philosophy from a different perspective and collectively they reveal an array of insightful approaches to self-induced enhancement for both individuals and cultures **Embodiment, Relation, Community** Garnet C. Butchart, 2019-01-08 In this volume Garnet C Butchart shows how human communication can be understood as embodied relations and not merely as a mechanical process of transmission Expanding on contemporary philosophies of speech and language self and other and community and immunity this book challenges many common assumptions constructs and problems of communication theory while offering compelling new resources for future study Human communication has long been characterized as a problem of transmitting information or the outward sharing of inner thought through mediated channels of exchange Butchart questions that model and the various theories to which it gives rise Drawing from the work of Giorgio Agamben Roberto Esposito Jean Luc Nancy and Jacques Lacan thinkers who along with Martin Heidegger and Michel Foucault have critiqued the modern notion of a rational

subject Butchart shows that the subject is shaped by language rather than preformed and that humans embody and not just use the signs and contexts of interaction that form what he calls a communication community Accessibly written and engagingly researched Embodiment Relation Community is relevant for researchers and advanced students of communication cultural studies translation and rhetorical studies especially those who work with a humanistic or interpretive paradigm

The Scene of the Voice Michael Eng, 2023-03-01 The recent turns to affect and aesthetics in the humanities and the interpretive social sciences have been productive for reflecting on the crucial role sensibility plays in the constitution of the social However these scholarly developments construct their interventions by dismissing the attention to language that was central to the linguistic and cultural turns of previous eras and by claiming that language is an obstacle to experiencing the reality of difference to which they maintain only sensibility can grant access By analyzing the figure of the voice in the work of Martin Heidegger and the continental thinkers who follow him The Scene of the Voice shows that the dismissal of language in favor of sensibility requires overlooking their common connection in the problem of mimesis As this book ultimately argues artificially separating language and sensibility results in a failure to encounter affect the relation to difference affect is said to name and the experience of thinking affect is taken to provoke

European Cinema and Continental Philosophy Thomas Elsaesser, 2019-01-01 This groundbreaking volume for the Thinking Cinema series focuses on the extent to which contemporary cinema contributes to political and philosophical thinking about the future of Europe's core Enlightenment values In light of the challenges of globalization multi cultural communities and post nation state democracy the book interrogates the borders of ethics and politics and roots itself in debates about post secular post Enlightenment philosophy By defining a cinema that knows that it is no longer a competitor to Hollywood i e the classic self other construction Elsaesser also thinks past the kind of self exoticism or auto ethnography that is the perpetual temptation of such a co produced multi platform national cinema as world cinema Discussing key filmmakers and philosophers like Claire Denis and Jean Luc Nancy Aki Kaurismäki abjection and Julia Kristeva Michael Haneke the paradoxes of Christianity and Slavoj Žižek Fatih Akin Alain Badiou and Jacques Rancière Elsaesser is able to approach European cinema and assesses its key questions within a global context His combination of political and philosophical thinking will surely ground the debate in film philosophy for years to come

The History of Animals: A Philosophy Oxana Timofeeva, 2018-05-03 Oxana Timofeeva's *The History of Animals: A Philosophy* is an original and ambitious treatment of the animal question While philosophers have always made distinctions between human beings and animals Timofeeva imagines a world free of such walls and borders Timofeeva shows the way towards the full acceptance of our animality an acceptance which does not mean the return to our animal roots or anything similar The freedom generated by this acceptance operates through negativity is an effect of the rejection of the very core of metaphysical philosophy and Christian culture traditionally opposed to our animal nature and seemingly detached from it With a foreword by Slavoj Žižek this book is accessible jargon free and ideal for students and all

Editorial Advisory Board Albertina Albors Llorens John Bell Alan Dashwood Simon Deakin David Feldman Richard Fentiman Angus Johnston John Spencer Founding Editors Alan Dashwood and Angela Ward Political Loneliness Jennifer Gaffney, 2020-07-07 Political Loneliness Modern Liberal Subjects in Hiding examines the loneliness that remains at work in modern life even as we find ourselves increasingly interconnected While much has been said about this experience in the main currents of continental philosophy this book opens new paths within this discourse by developing the problem of loneliness in a political register The central claim of this book is that neoliberal subjectivity has rendered us lonely Drawing especially on the work of Hannah Arendt the author suggests that the political structures we have inherited from the liberal tradition such as the anonymity of the vote and the right to pursue one's private self interest as far as possible have left us hidden from one another unable to appear as members of a common world The author further argues that it is precisely this experience of political loneliness that renders citizens in liberal and allegedly open societies desperate to belonging and willing in turn to surrender to delusional fellowships like totalitarianism By developing the problem of loneliness in a political register this book offers a framework for interpreting the rise of totalitarianism at the beginning of the twentieth century no less than the recent ascendance of right wing populism in Western liberal democracies today It thus makes an important contribution to debates in current continental philosophy liberal political theory and critical theory regarding issues of alienation political life and community in

the present age **Jean-Luc Nancy** Benjamin Hutchens,2011-12-15 Before now Jean Luc Nancy s contributions to legal and political theory have been largely overlooked and lacking the in depth appraisal they deserve In this unique collection eighteen notable Nancy scholars contextualize Nancy s work in these areas within the broad corpus of his other concerns By emphasizing the originality of his theories in a globalizing age each distinctive chapter provides a new and valuable insight into Nancy s legal and political philosophy Together with his work on sense community and art these cutting edge contributions examine Nancy s conceptions of justice legality and world in conjunction with the interpretation and rationality of The ontology of the event The form of relationality The effects of globalization The importance of Christianity in contemporary legal and political theory Including a brand new essay by Nancy himself this collection marks an important and timely step in a rich area of study **Law, Relationality and the Ethical Life** Tom Frost,2021-08-30 This first book length study into the influence of Emmanuel Levinas on the thought and philosophy of Giorgio Agamben Law Relationality and the Ethical Life demonstrates how Agamben s immanent thought can be read as presenting a compelling albeit flawed alternative to Levinas s ethics of the Other The publication of the English translation of The Use of Bodies in 2016 ended Giorgio Agamben s 20 year multi volume Homo Sacer study Over this time Agamben s thought has greatly influenced scholarship in law the wider humanities and social sciences This book places Agamben s figure of form of life in relation to Levinasian understandings of alterity relationality and the law Considering how Agamben and Levinas craft their respective forms of embodied existence that is a fully formed human that can live an ethical life the book considers Agamben s attempt to move beyond Levinasian ethics through the liminal figures of the foetus and the patient in a persistent vegetative state These figures which Agamben uses as examples of bare life call into question the limits of Agamben s non relational use and form of existence As such it is argued they reveal the limitations of Agamben s own ethics whilst suggesting that his abandoned project can and must be taken further This book will be of interest to scholars researchers graduate students and anyone with an interest in the thought of Giorgio Agamben and Emmanuel Levinas in the fields of law philosophy the humanities and the social sciences **Deconstruction and Democracy** Alex Thomson,2007-12-15 No democracy without deconstruction Deconstruction and Democracy evaluates and substantiates Derrida s provocative claim assessing the importance of this influential and controversial contemporary philosopher s work for political thought Derrida addressed political questions more and more explicitly in his writing yet there is still confusion over the politics of deconstruction Alex Thomson argues for a fresh understanding of Derrida s work which acknowledges both the political dimension of deconstruction and its potential contribution to our thinking about politics The book provides cogent analysis and exegesis of Derrida s political writings explores the implications for political theory and practice of Derrida s work and brings Derrida s work into dialogue with other major strands of contemporary political thought Deconstruction and Democracy is the clearest and most detailed engagement available with the politics of deconstruction and is a major contribution to scholarship on the later works of

Jacques Derrida most notably his *Politics of Friendship* **The Biopolitics of Race** Sokthan Yeng, 2013-11-11 Many political figures insist that their anti immigration sentiments have nothing to do with race and racism Americans seem largely unconvinced which is why politicians must protest so loudly and often In order to deflect accusations of racism public figures evoke the neo liberal principle that calls for protection of state health and resources Yet contemporary philosophers such as Hanna Arendt Michel Foucault and Giorgio Agamben argue that neo liberal ideology is racist Sokthan Yeng applies their analysis to the debate over immigration policies to show that neo liberalism not only recodes traditional racist rhetoric but also expands systemic racism Politicians can say that their anti immigration policies are meant to protect the nation s economy and strength It is no coincidence however that the populations most affected by these regulations are ethnic and cultural minorities such as Mexican and Muslim immigrants The analysis presented in *The Biopolitics of Race* will be valuable to philosophers and other scholars or students interested in critical race theory feminism and queer theory It also has implications for anyone working in public health bioethics or migration studies **Heidegger and the Global Age** Antonio Cerella, Louiza Odysseos, 2017-10-18 Globalization is one of the most contested and abused concepts of our time Whether one interprets it as a collective illusion or as the final stage of capitalism as uncontrollable multitude or as a radical opening of new spaces of freedom the global age represents the conceptual and existential background of our being in the world But what lies behind this process What mode of human existence is brought about by the age of technology and global mobilization And is it possible to attempt a unitary interpretation of this age that presents itself as both total and pluralistic This volume rethinks these epochal questions in light of Martin Heidegger s complex hermeneutics proposing at the same time that such questions enable the interrogation of some of its most fundamental aspects the metanarrative of *Seinsgeschichte* as withdrawal of Being the structure of human existence within the frame of technology the relation between humanism and nihilism as well as politics and technology the changing character of subjectivity in the age of the world picture the mythopoeic force of art and the uprooting of human beings As this volume shows interrogating Heidegger s thought has significant potential for both International Political Theory and also the analysis of specific concepts and dynamics in contemporary international studies such as the changing character of spatiality temporality and subjectivity
