The Crash of Ethiopian Airlines Flight 409 Hans Griffioen, editor,2012-04 On 25 January 2010 at 00 41 30 UTC Ethiopian Airlines flight ET 409 a Boeing 737 800 on its way from Beirut to Addis Abeba crashed just after take off from Rafic Hariri

International Airport in Beirut Lebanon into the Mediterranean Sea about 5 NM South West of Beirut International Airport All 90 persons on board were killed in the accident The investigation concluded that the probable causes of the accident were pilot errors due to loss of situational awareness Ethiopian Airlines refutes this conclusion Other factors that could have lead to probable causes are the increased workload and stress levels that have most likely led to the captain reaching a situation of loss of situational awareness similar to a subtle incapacitation and the F O failure to recognize it or to intervene accordingly Ethiopian Airlines refutes the investigation According to the airline the final report was biased lacking evidence incomplete and did not present the full account of the accident

Guidebook for Air Cargo Facility Planning and Development Mike Maynard,2015 The guidebook presents a broad discussion of the various issues that must be addressed in planning air cargo facilities It describes tools and techniques for sizing facilities including data and updated metrics necessary to forecast future facility requirements as a function of changing market and economic conditions The procedures offered support airport operators in crafting effective business plans and development decisions that meet the industry s current and future technological operational and security challenges in a cost effective efficient and environmentally sensitive manner

From Cessna to Boeing Facundo Conforti,2023-07-02 The transition from one aircraft to another is not a problem in a pilot s career if the change is gradual or of similar characteristics However when this change is made more abruptly it results in a more difficult transition to understand and assimilate It wouldn t be difficult to change from a Cessna 152 to a Cessna 172 to mention random models but going from flying a Cessna 172 to flying a Boeing B737 would be a much more challenging and complex task to overcome In this book you will learn about the most important systems of three completely different aircraft a Cessna 172 a Cessna 208 Caravan and a Boeing B737 The objective is to understand and analyze each of their differences while discovering that in all cases the operating principles will always be the same A unique book in its genre A comparative and descriptive work that will provide you with the tools to face future aircraft transitions that you may encounter in your career

Airline Operations Control Peter J. Bruce,Chris Mulholland,2020-12-28 This text is among the first to reveal the intricacies of an airline s Operations Control Centre especially the thought processes information flows and strategies taken to mitigate disruptions Airline Operations Control provides a deep level of description explanation and detail into the activities of a range of highly professional and expert staff managing the sharp end of the airline It aims to fill a void as little is understood about this area and very little is written for practitioners in the airline business The book offers a comprehensive look at the make up of the Operations Centre its component sections and the processes that occur both in preparing for and executing the current day s schedules Several chapters provide real life scenarios and demonstrate how Operations Centres manage evolving situations what they need to take into account and how they need to have Plan B and Plan C ready when things don t go right This book

is designed to deliver knowledge gains to both new and experienced aviation industry practitioners with regards to vital operational aspects. Additionally, it also offers students of air transport management a readily accessible and real-world perspective guide to a crucial function present within every airline. *Real Time Graphics*, 1999
