Pathology and Surgery Boyd Samuel, Gutierrez Angela Maria, McCulley James P., Actualizaciones en el diagnóstico y tratamiento del queratocono Dra. Gracia Castro de Luna, Dr. Antonio Pérez Rueda, 2021-07-29 La importancia del diagnóstico y tratamiento precoz del queratocono viene dada por su alta incidencia y prevalencia en pacientes de temprana edad y su carácter evolutivo siendo la primera causa de trasplante de córnea en España. Además, el sureste de la península ibérica es un área endémica de la enfermedad. La exposición a agentes alérgicos y a radiación ultravioleta podrán acelerar su aparición y progresión. En etapas avanzadas de la enfermedad existe un importante compromiso de la agudeza visual del paciente afectando gravemente a la calidad de vida del mismo. Existen una gran cantidad de tratamientos que han demostrado frenar la evolución de la enfermedad: crosslinking y mejorar la calidad visual de los pacientes con anillos corneales intraestromales los cuales podrán evitar la realización final de una queratoplastia. El estudio mediante topografía corneal de estos pacientes es imprescindible para realizar un diagnóstico precoz y evitar cirugías refractivas corneales futuras. Es de gran interés conocer las normas básicas de interpretación de la topografía corneal y los índices diagnósticos de queratocono que ayudarán a anticiparse al diagnóstico en etapas clínicas. En este libro se presentan los últimos avances en el diagnóstico y tratamiento del queratocono.

Distrofías y Degeneraciones Corneales Samuel Boyd, 2012-11 Esta publicación es un texto práctico y útil que ayudará a comprender mejor las patologías corneales así como el planeamiento ya sea terapéutico o quirúrgico. El estudio de esta entidad es verdaderamente fascinante ya que por su relativa poca incidencia en la población muchas veces se carece de la experiencia a la hora de diagnosticarlas e identificarlas apropiadamente.

Atlas y Texto de Patología y Cirugía Corneal Samuel Boyd, 2012-10 Lo último en el manejo clínico y quirúrgico de las enfermedades corneales ha sido presentado en este Volumen. Temas esenciales sobre Infecciones e Inflamaciones Corneales y Desórdenes de la Superficie Ocular tales como conjuntivitis bacteriana y viral, queratitis bacteriana y no bacteriana, procedimientos diagnósticos en las Queratitis infecciosas, etiología y manejo del ojo seco, deficiencia lagrimal acuosa y síndrome Sjögren, epifora, blefaritis crónica y epiescleritis, etiología y manejo del pterigium, afecciones de la córnea relacionadas con los lentes de contacto.
