Yaeger, 2022-01-01 The U S military as the core constituent of the Department of Defense collectively represents the largest and most complex organization on earth As such the U S military implemented the largest formal OD programs in the world These programs from inception to present day utilized diverse and evolving OD intervention typologies to garner congruence with the environment The research for this book accomplished using an inductive grounded theory approach examined the initiatives that fostered the use of OD intervention typologies The findings revealed three major epochs of OD interventions that span a 50 year timeline The epochs include 1 Traditional OD 2 Total Quality Management TQM and 3 Continuous Process Improvement CPI The epoch of Traditional OD represents the use of human process interventions while TQM and

CPI represent the use of technostructural interventions In the end the relationship between organization design and culture and the selection of OD intervention typologies were best explained using variables that explicate diverse environmental occurrences that influenced senior military leaders perceived need for specific OD interventions These perceived needs were predicated on the requirement to exploit vital resources in an effort to bolster warfighting operational readiness in support of the American citizenry *Compromise Planning : A Theoretical Approach from a Distant Corner of Europe* Louis C.

Wassenhoven,2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North West The empirical material of this effort is derived from a country Greece which sits on the edge between North West and South East at the corner of Europe No doubt there is extensive international literature on planning theory in general from a bewildering variety of viewpoints The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books articles and research reports on planning theory and of their never ending borrowing of obscure concepts from more respectable scientific disciplines from mathematics to philosophy and from physics to economics human geography and sociology He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so called Global South The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of the North West to countries with a totally different historical political social and geographical background He learned that the reality that planners face is unpredictable patchy and responsive to social processes frequently of a very pedestrian nature Planning strives to deal with private interests which planners are keen to envelop in a single public interest which is extremely hard to define The behaviour of the average citizen far from being that of the neoclassical model of the homo economicus is that of an individual a kind of homo individualis who interacts with the state and the public administration within a complex web of mutual dependence and negotiation The state and its administrative apparatus i e the key determinants and fixers of urban and regional planning policy bargain with this individual offer inducements exemptions derogations and privileges deviate unhesitatingly from their grand policy pronouncements but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized It is by and large a successful modus vivendi but only thanks to a constant practice of compromise Hence the term compromise planning which the author coined as an alternative to all the existing theoretical forms of planning This is the sort of planning and of the accompanying theory with which he deals in this book It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England and Greece research and professional involvement **Methodological Approaches for**

Workplace Research and Management Chiara Tagliaro,Marko Orel,Ying Hua,2023-09-14 This book explores a wide range of methodological approaches to examining various forms of workplace physical environments It focuses on pressing questions regarding the relationship between the spatial component of the workplace including its progressive hybridisation

with other physical and virtual places and its users be they public organisations private companies or start up businesses and solopreneurs International contributors address a range of methods that are applicable both in research and practice to confront the most cutting edge workplace related issues The assumption is that work has been changing thanks to the virtualisation of many activities and that homeworking and hybrid working modes are expected to increase significantly after Covid 19 Thus spaces hosting work need to adapt accordingly Researchers and practitioners have been struggling to determine how much space will be needed by companies what kind of space will better host different work activities which workers are more suited for working from home and which instead are more productive if they have an office based working arrangement The necessary evolution of the office should follow evidence based decisions on the abovementioned matters which are only possible through rigorous investigations This volume aims to support these investigations which call for inventive applications of qualitative and quantitative methodologies By doing so the book will encourage solid practices and thorough research agendas in workplace design management and use Contributions come from different disciplines including facilities management real estate management psychology design architecture sociology and organisation studies Chapters highlight the importance of appropriate methodologies borrowed from different fields in addressing contemporary questions and developments in workplaces By analysing the challenges and opportunities for conducting rigorous research in different workplace settings this book will be critical reading for both academics and students as well as for decision makers and professionals who deal with workplace design and management The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
