Using The Human Record, Sources of Global History, Fourth Edition, Volumes I and II Alfred J. Andrea, 2001

Discipline Problems Tadashi Dozono, 2024-05-07. Angel, a Black tenth grader at a New York City public school, self-identifies as a nerd and likes to learn. But she's troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas, presenting a sugar-coated image of the United States that is at odds with her everyday experience. The history I learned in school is simpler, she says. The world I live in is a lot more complex. Angel, like every student interviewed in *Discipline Problems*, has been identified by teachers as a troublemaker: a student whose behavior disrupts classroom norms and interferes with instruction. But her critiques of the curriculum she's taught speak to her curiosity and insight: crucial foundations for understanding history. Like many students who have been marginalized by systemic racism in American schools, she exposes the shortcomings of her classrooms' academic environments by challenging both the content and the methods of her education. All too often these challenges are framed as troublemaking, and the students are disciplined for acting out instead of being rewarded for their intellectual engagement. Tadashi Dozono, a professor of education and former high school social studies teacher, takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum. He reinterprets troublemaking, usually cast as a behavioral deficit, as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of

color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners *Classroom Management in Teacher Education Programs* Jonathan Ryan

Davis,2017-09-22 This book investigates the impact of integrating culturally relevant and pedagogically dynamic classroom management strategies into the curriculum of an urban secondary education pre service methods course The book begins by framing the problem of integrating classroom management into the lives of those learning to teach impact It then examines multiple case studies of students from the study s control cohort who did not have classroom management coursework in their methods course After breaking down the challenges encountered by the control students the book offers DCMA as a framework from which teacher educators might create an integrative methods course The book then analyzes students from the study s experimental cohort and how they benefited from such an integrative course throughout their teacher preparation and into their first year of teaching
