Introduction

Publication date: 07 Oct 2015

Objective and scope

Publication date: 07 Oct 2015

20.41 The objective of IAS 2 is to set out the accounting treatment for inventories. The standard notes that the key consideration in accounting for inventories is determining the amount of cost to be recognised as an asset and carried forward, until the related revenue is recognised. 20.42 IAS 2 applies to all inventories, (that is raw materials, consumable supplies, work in progress and finished goods) except the following, which are wholly excluded from its scope:

- Work in progress arising from construction contracts, including directly related service contracts (dealt with by IAS 11).
- Financial instruments (dealt with in IAS 39).
- Biological assets related to agricultural activity and agricultural produce at the point of harvest (dealt with by IAS 41).

[[IAS 2 para 2](#)].

20.43 In addition, the standard does not apply to the measurement of the following types of inventories (but does apply in all other respects, for example, disclosure):

- Inventories held by producers of agricultural and forest products, agricultural produce after harvest, and minerals and mineral products, to the extent that they are measured at net realisable value in accordance with well-established practice in those industries. Where such inventories are measured at net realisable value, changes in that value are recognised in profit or loss in the period of change.
- Inventories held by commodity broker-traders who measure their inventories at fair
