instruments administered under controlled conditions with known stimulus properties and validity indicators The CPI and

MMPI measures will frequently be instruments of choice in research on personality and psychodynamics of offenders

CHAPTER 6 Law Enforcement and Police This chapter encompasses a variety of scales that refer to law enforcement or

police agencies Unfortunately in the case of many scales these terms are used simply with the assumption that the

respondents understand the concepts and use them in the same way as researchers In other cases however specific policing

functions are identified and described As noted in Chapter 3 a standard order of scale presentation is followed First the

attitudes scales are presented followed by the behavior ratings per sonality measures milieu ratings prediction measures and

finally the very broad category of description After the reviews are completed within each subcategory other scales in that

category are listed See Chapter 2 for a description of the criteria that were used in deciding upon whether a scale would be

reviewed or simply listed Listed scales are presented by title and bibliographic reference followed by a very brief description
