### **HADI PRACTICAL NEONATOLOGY BOOK 2 DR.ABDELHADI ABDELGABBAR**

ABDELHADI MBBS, MRCP, FRCPC, 2024-01-24 Hadi Practical Neonatology. Hadi PN is a 2-book series of practical guidelines intended to provide a structured approach to the management of neonatal conditions which are likely to face the neonatal team. It is not intended to replace neonatal textbooks or to teach the beginners in the field. Prior sound knowledge of Neonatal Medicine by the user is essential. This book is the second in the series. It covers aspects of NEUROLOGY, FLUIDS, ELECTROLYTES, VASCULAR ACCESS, SAMPLING, FREQUENT CHALLENGES, HAEMATOLOGY, JAUNDICE, and ESSENTIAL PROCEDURES/PRACTICES challenges. It is my belief that neonatal doctors and nurses are an integrated team, and any demarcation is an imaginary line. The recipe of creating a backbone of good nurses is passionate support, continuous education, and practical teaching at every possible opportunity. Mutual trust and appropriate delegations are crucial to the success of the team. Hadi PN series is written for the neonatal team and not just for the medical staff. The best way for consolidating the team knowledge and experience is bedside teaching. New methods and approaches of neonatal management are progressing but seem to slow down over the last 2-3 years. This may reflect the fact that neonatal advances are approaching our era's peak of what is possible. Nevertheless, many of our current practices are yet to be scrutinized to fulfil the evidence-based pathways and standards. There is no robust verification of our current practice of many routine day-to-day applications. This includes but is not limited to fluid requirements, duration of antibiotics courses, use of various blood products.
