Introduction to Software Architecture Kevin Lano, Sobhan Yassipour Tehrani, 2023-10-03 This unique accessible textbook gives a comprehensive introduction to software architecture using clean architecture concepts with agile methods and model driven development. The work introduces the key concepts of software architectures and explains the importance of architectural design for the long term usefulness and sustainability of software systems. In addition it describes more than 30 architectural styles and patterns that can be used for constructing mobile applications, enterprise and web applications, machine learning systems and safety critical systems. Topics and features: Combines clean architecture principles with agile model driven development; Employs practical examples and real industrial cases to illustrate architectures for mobile apps, web apps, enterprise systems, safety critical systems and machine learning systems; Explores support tools for architectural design and system development using the approach; Provides tutorial questions and slides to support teaching and learning; Delivers material that has been class tested over 10 years with more than 1 000 students. The textbook can be used to support teaching of an undergraduate module in software architecture yet also includes more advanced topics suitable for a specialised software architecture module at master's level. It also will be eminently suitable and relevant for software practitioners and researchers needing or wanting to explore the field in short courses or self study. Dr Kevin Lano is Reader in Software Engineering Department of Informatics King's College London UK. Dr Sobhan Yassipour Tehrani is a Lecturer in Department of Computer Science University College London UK.

Oxford Textbook of Palliative Nursing Betty R. Ferrell, Nessa Coyle, Judith A. Paice, 2015 The Oxford Textbook of Palliative Nursing is the definitive text on nursing care of the seriously ill and dying. It is a comprehensive work addressing all aspects of palliative care including physical, psychological, social and spiritual needs. The text is written by leaders in the field and includes an impressive section on international palliative care. Each chapter includes case examples and a strong evidence base to support the highest quality of care. The book is rich with tables and figures offering practical resources for clinical practice across all settings of care and encompassing all ages from pediatrics to geriatrics.

The Publishers Weekly, 2002 **Eustatic Versus Tectonic Control on Foreland Basin Fill** Janine Zweigel, 1998
This contribution presents a thorough study of the SE German molasse basin its subsidence history and the sequence stratigraphy in the sediments of that basin. The study is based on seismic and borehole data generously provided by German petroleum companies. A detailed outcrop study of marine Molasse deposits was carried out to they are thought to be analogues of sandy tidal sediments. Using probabilistic modelling and simulations it was found that the reservoir characteristics due to the simple layercake structure of the Molasse sediment can be predicted from the data of one single well. The results of the sequence stratigraphic study and those of the subsidence analysis are described and used as input
