The NATO Intervention in Libya Kjell Engelbrekt,Marcus Mohlin,Charlotte Wagnsson,2013-10-01 This book explores lessons learned from the military intervention in Libya by examining key aspects of the 2011 NATO campaign NATO s intervention in Libya had unique features rendering it unlikely to serve as a model for action in other situations There was an explicit UN Security Council mandate to use military force a strong European commitment to protect Libyan civilians Arab League political endorsement and American engagement in the critical initial phase of the air campaign Although the seven month intervention stretched NATO s ammunition stockpiles and political will almost to their respective breaking points the

definitive overthrow of the Gaddafi regime is universally regarded as a major accomplishment With contributions from a range of key thinkers and analysts in the field the book first explains the law and politics of the intervention starting out with deliberations in NATO and at the UN Security Council both noticeably influenced by the concept of a Responsibility to Protect R2P It then goes on to examine a wide set of military and auxiliary measures that governments and defence forces undertook in order to increasingly tilt the balance against the Gaddafi regime and to bring about an end to the conflict as well as to the intervention proper while striving to keep the number of NATO and civilian casualties to a minimum This book will be of interest to students of strategic studies history and war studies and IR in general **National Union Catalog**,1973 Includes entries for maps and atlases Administrative Rulemaking and Planning in European Laws Giacinto della Cananea,Angela Ferrari Zumbini,2025-03-15 Administrative rulemaking and planning is an under studied and under theorized area of public law To better understand how administrative functions and powers are discharged by public authorities and private bodies this seventh volume in the Common Core of European Administrative Law series argues that we must consider all forms of administrative action not just formal procedures and judicial review As such greater attention needs to be paid to administrative rulemaking and planning which have a significant impact on economics and society Through extensive comparative research this book examines this increasingly important field of administrative law It focuses mainly on Europe analysing ten national systems including eight European Union member states Norway and the UK but it also explores the legal systems of the United States and China as well as that of a non state entity the European Union itself The questions investigated across these systems include whether administrative agencies may fetter their discretion through policy and rules whether their rules must be published and what remedies are available when plans adversely impact individual rights These questions are examined through a factual analysis based on a set of ten hypothetical cases which are discussed by national experts This comparative approach identifies commonalities and differences between legal systems such as in consultation and transparency in the rights of public service users and in legal remedies to address rules and plans As in other volumes in the series both similarity and difference are essential to understanding how a common core is shaped and evolves **Taxation of Cross-border Partnerships** Jesper Barenfeld,2005 Aims to identify and analyse problems related to double taxation of income attributable to cross border partnerships in asymmetrical situations de lege lata This refers to cases where the same partnership in across border owner entity situation is recognized as a taxable person in one country but as transparent for tax purposes in the other Subject Catalog Library of Congress,1982 **Krijimi i së drejtës dhe roli i teknikës juridike** Bajram Pollozhani,2003 *International Congress and Workshop on Industrial AI 2021* Ramin Karim,Alireza Ahmadi,Iman Soleimanmeigouni,Ravdeep Kour,Raj Rao,2022-02-07 This proceedings of the International Congress and Workshop on Industrial AI 2021 encompasses and integrates the themes and topics of three conferences eMaintenance Condition Monitoring and Diagnostic Engineering management COMADEM and Advances in
