Forest Resource Policy in Latin America Ronnie de Camino, Julio C. Tresierra, Ramón López, Thomas Kelly, Markku Simula, Kari Keipi, Carlos Felipe Jaramillo, Olli Haltia, Jared J. Hardner, Marc J. Dourojeanni, Jan G. Laarman, Richard Rice, 2000-01-01 Forest Resource Policy in Latin America gathers the thinking of a score of experts on sustainable use and management of forests including incentives for investment The authors tackle the thorny social issues of property rights deforestation and forest management and ownership by indigenous people and take a hard look at the trade and environmental issues in forest production that will affect future directions for sustainable forestry development in Latin America Some argue that the main opportunity to conserve natural forests lies in recognizing and paying for the environmental services they provide In addition compensatory measures such as the establishment and better management of strictly protected areas appear to be the best tools to delay the loss of ecosystems and species Alternative forest concession policies and trade and environmental issues in forest production are also analyzed

Groundwater Ecology and Evolution Florian Malard, Christian Griebler, Sylvie Retaux, 2023-03-11 Groundwater Ecology and Evolution Second Edition is designed to meet a multitude of audience needs The state of the art in the discipline is provided by the articulation of six sections The first three sections successively carry the reader into the basic attributes of groundwater ecosystems section 1 the drivers and patterns of biodiversity section 2 and the roles of organisms in groundwater ecosystems section 3 The next two sections are devoted to evolutionary processes driving the acquisition of subterranean biological traits section 4 and the way these traits are differently expressed among groundwater organisms section 5 Finally section 6 shows how knowledge acquired among multiple research fields sections 1

to 5 is used to manage groundwater biodiversity and ecosystem services in the face of future groundwater resource use scenarios Emphasis on the coherence and prospects of the whole book is given in the introduction and conclusion Provides a modern synthesis of research dedicated to the study of groundwater biodiversity and ecosystems Bridges the gap between community ecology evolution and functional ecology three research fields that have long been presented isolated from each other Explains how this trans disciplinary integration of research contributes to understanding and managing of groundwater ecosystem functions Reveals the contribution of groundwater ecology and evolution in solving scientific questions well beyond the frontiers of groundwater systems

Transformations in the Septuagint Theo A. W. van der Louw, 2007 This study inaugurates interaction between Septuagint research and Translation Studies From the field of Translation Studies the author has singled out approaches suited to LXX research The historical survey of views of translation in Antiquity reveals that among Greeks Romans Egyptians and Jews similar disputes about language and translatability existed Three Septuagint chapters Genesis 2 Isaiah 1 and Proverbs 6 are analysed in depth whereby the transformations shifts are categorised with help of linguistic Translation Studies Before ascribing deviations either to the translator s ideology or to a variant in the Hebrew parent text we must ascertain that the deviation does not have a purely translational origin Every transformation has a reason and by categorizing the reasons behind all transformations one can trace the translational hierarchy that unconsciously guided the translator The rationale behind a transformation can be detected by analysing the literal alternative which the translator rejected The conclusions of this study are of importance for Translation Studies Classical Studies and Theology
