Optics for Ophthalmologists Alfredo A.

Sadun, James D. Brandt, 2012-12-06 This manual is written to assist the student of optics or the ophthalmology resident in reviewing optics. It is particularly suitable as an optics Board review. However, it was not intended to accomplish the far greater task of encompassing the entire field of geometric optics or even of teaching all that the ophthalmologist needs to know of visual optics or refraction. This manual represents the distillation of lecture notes for an optics Board review course given at the Massachusetts Eye and Ear Infirmary, Harvard Medical School, for the last seven years. This optics lecture series, which has also been given at Boston University and at the University of Southern California, has traditionally taken place over a week with three two-hour sessions. Obviously, this six-hour lecture series could not possibly cover the entire field of optics for clinicians. This optics Board review lecture series has customarily involved a few problems at the end of each lecture, which then provided a basis for a review that was given at the beginning of the next lecture. These problems have always proven a useful means of self-testing as well as practice for becoming more comfortable and facile with the concepts involved. The problems have not been taken from the American Board of Ophthalmology test materials, either written or oral. However, they incorporate many of the concepts and computational manipulations which are frequently tested on the ophthalmology boards.

*Last-Minute Optics* David G. Hunter, Constance E. West, 2024-06-01 The popular optics review manual *Last Minute Optics: A Concise Review of Optics, Refraction and Contact Lenses* has been revised and updated into a Second Edition. This unique resource boils down the overwhelming subject matter of clinical optics and refraction, helping the ophthalmologist cover the essentials in a single review manual. The content is based upon the practical experience of two clinically active experts who lecture on ophthalmic optics around the world. This updated Second Edition by Drs. David G. Hunter and Constance E. West includes new questions added to selected chapters and a new chapter covering refractive surgery, as well as a key chapter that helps you evaluate patients with symptoms related directly to optical or refractive concerns. The complex concepts of optics are revealed in easy-to-understand explanations, enhanced by simple illustrations. *Last Minute Optics, Second Edition* allows you to test your knowledge while increasing your understanding of optics. Designed in a clear, concise question and answer format, this book allows for self-assessment and a chance to test your understanding before you read the answer. Features of the Second Edition: Written in a light and approachable style to make optics accessible and understandable. Unique question and answer format allows for self-assessment while studying to identify areas where more work is needed. Perfect for limited study time. Includes real-life examples that are clinically relevant. Numerous practical tips to help enhance clinical practice. Includes 223 questions and answers. Whether you're an ophthalmologist, ophthalmic technician, resident, or student reviewing the optics facts and concepts, it's easier with *Last Minute Optics: A Concise Review of Optics, Refraction and Contact Lenses, Second Edition*.
