For trainers, free additional material of this book is available. This can be found under the Training Material tab. Log in with your trainer account to access the material. In all enterprises around the world, the issues, opportunities, and challenges of aligning IT more closely with the organization and effectively governing an organization's IT investments, resources, major initiatives, and superior uninterrupted service is becoming a major concern of the Board and executive management. An integrated and comprehensive approach to the alignment, planning, execution, and governance of IT and its resources has become critical to more effectively align, integrate, invest, measure, deploy, service, and sustain the strategic and tactical direction and value proposition of IT in support of organizations. Much has been written and documented about the individual components of IT Governance, such as strategic planning, demand management, program and project management, IT service management, strategic sourcing, and outsourcing, performance management, metrics, compliance, and others. Much less has been written about a comprehensive and integrated approach for IT Business Alignment, Planning, Execution, and Governance. This title fills that need in the marketplace and offers readers structured and practical solutions using the best of the best practices available today. The book is divided into two parts which cover the three critical pillars necessary to develop, execute, and sustain a robust and effective IT governance environment: Leadership, people, organization, and strategy; IT governance, its major component processes, and enabling technologies. Each of the chapters also covers one or more of the following action-oriented topics: the why and what of IT strategic planning, portfolio investment management, decision authority, etc., the how of IT Program, Project Management, IT Service Management, including ITIL Strategic Sourcing, and

outsourcing performance risk and contingency management including COBIT the Balanced Scorecard etc and leadership team management and professional competences
