THE CLUTCH UNIT

DESCRIPTION (Fig. 1)

The drive plate assembly (7) is of the flexible cone type in which a splined hub is radially stretched to a disc and transmits the power and torque through a number of coil springs held in position by shims.

The cover assembly consists of a ground steel cover (1) and a cast iron pressure plate (6) loaded by a spring assembly.

The spring assembly consists of a diaphragm spring (4) and a release ring (3) which is held in place in the top of the pressure plate by means of a spring retaining ring (2).

Release of the clutch assembly is effected by shifting levers in the foot pedal and by fitting balance weights (11).

A graphite release bearing (8) is shown in a housing (9) which is mounted on the throw-out fork and held by the release bearing retainer springs.
