It has been argued that the use of the term "cognitive" in the title of the book is inappropriate because it implies a focus on the internal mental processes of the individual, rather than on the external social and cultural context in which these processes occur. However, the book does not focus on the internal mental processes of the individual, but rather on the external social and cultural context in which these processes occur. The book is a critical analysis of the social and cultural context in which cognitive processes occur, and it is not a book about the internal mental processes of the individual.
