

Regulating Voltage

1. Complete the charging circuit with a fully charged battery and operate the alternator at the specified speed.
2. Measure the battery voltage with a volt meter.
3. If the measurement is not within the specified values, replace the regulator.

Regulating voltage	Factory specification	14 to 15V at 5200 rpm
--------------------	-----------------------	-----------------------

[3] DISTRIBUTOR CHECKING

Inspect Air Gap

1. Using a feeler gauge, measure the gap between the signal rotor and the pickup coil projection.

Air gap	Factory specification	0.2 to 0.4 mm 0.008 to 0.016 in.
---------	-----------------------	-------------------------------------

CAUTION

- Since the ignition part of the distributor has been completely mold-shielded, it is rather difficult to check even if the following instructions are followed. Replacement of the entire assembly is best if a malfunction is suspected.

[4] SPARK PLUG AND IGNITION COIL CHECKING

Spark Test

1. Remove the spark plug, put it inside the high voltage cord cap firmly, and then ground the threaded section to the engine body (not to painted or resin parts).
2. Rotate the starter with the key switch and check that the plug sparks.

CAUTION

- This test is hazardous of electric shocks. Never use hand or screwdriver to press the plug to ground it to the engine body.
- Keep inflammables away from the engine.
