Like Sound Through Water A Mothers Journey Through Auditory Processing Disorder:

Like Sound Through Water Karen J. Foli, Edward M. Hallowell, 2002-03-07 Ben was a bright happy little boy Yet he was easily distracted he wouldn't make eye contact and he couldn't comprehend the simplest things said to him At age three he still hadn't started talking Finally Karen Foli knew she had to act and she took her son to a speech and hearing clinic What the clinicians reported chilled her Ben's speech and language were delayed by one to two years Testing results and speech therapists suggested problems that included the words probably retarded and perhaps autistic But Karen trusting her mother's intuition knew that Ben was intelligent and that he was frustrated by his inability to communicate so she continued to try to help her son She discovered that he possessed the hallmarks of auditory processing disorder the aural equivalent of dyslexia Like Sound Through Water is the story of Karen's struggle to get Ben the help he needed to learn the most basic skill of all to communicate with the world She ran the gauntlet of medical disbelievers and pediatric therapists who refused to understand the very new findings of auditory processing disorder Even her husband a psychiatrist specializing in children's afflictions had never heard of APD Despite this he kept a steadfast faith in his son Now after years of intensive treatment for APD Ben is an academically successful hardworking little boy with a bright future to look forward to Like Sound Through Water is a testament to a mother's love and her devotion to her son's care it is also an instructive journey for those who are discovering the world of APD and a guidebook to negotiating the land mines of its treatment Above all it is a beautifully written tale of hope and optimism

Like Sound Through Water Karen J. Foli, 2003-07-22 An impassioned and ultimately inspiring account of one woman's journey to help her son through auditory processing disorder the aural equivalent to dyslexia that afflicts millions of children worldwide **SAME JOURNEY - DIFFERENT PATHS** Various Authors, 2013-05-24 **Don't**

You Get It? Living with Auditory Learning Disabilities Harvey Edell, Jay R. Lucker, Loraine Alderman, 2012-10-03

Auditory Processing Disorder APD affects as many as 5 percent of children It has been called a hidden disability because it is often mistaken for everything from odd behavior and deafness to other disorders such as ADHD or sometimes even autism It is none of those things It is a processing problem considered a learning disability where the child or adult is unable to integrate information that is spoken to them It can be a very debilitating disorder affecting the child in many aspects of life from academics to peer relationships And many children and adults have the disorder and don't even realize Don't You Get It Living With Auditory Learning Disabilities A Guide for Parents and Professionals was written by three experts in the field led by educator and speech language pathologist Dr Jay Lucker along with Dr Loraine Alderman a school psychologist and Harvey Edell a former teacher And all three co authors have APD The book is filled with important information about the disorder but even more so it gives several real life accounts on how APD actually manifests itself The book also addresses the inherited nature of APD through the intergenerational stories by Edell his daughter Alderman and Alderman's teenage son Andrew This is an important book to read if your child often asks What or just doesn't seem to get it And Lucker is one of the

most respected sources when it comes to this disorder so you shouldn't pass up any opportunity to read what he has to say. Ever realize that you or someone you know does not recognize subtle differences between sounds in words even though the sounds themselves are loud and clear? For example the request "Tell me how a chair and a couch are alike" may sound like "Tell me how a hair and a cow are alike." Or how the constant low tapping or clicking noise can drown out the hearing of a louder conversation causing certain words not to be heard. These kinds of problems are experienced day in and day out by people suffering from a learning disability known as Auditory Processing Disorder (APD). It is not that the person with APD is not paying attention as many people assume; it is in fact that they are in a noisy environment or listening to complex information. Don't You Get It is a unique comprehensive book written by people who have had to live with APD and learn how to learn, grow and survive daily with it. People with Auditory Processing difficulty typically have normal hearing and intelligence. However they have also been observed to: Have trouble paying attention to any information presented orally; Have problems carrying out multi step directions; Need more time to process information; Have problems with their relationships or peers; Have difficulty with vocabulary, reading comprehension, spelling and understanding language or directional tasks; Mimic symptoms of Attention Deficit Disorder causing misdiagnosis and incorrect treatment. Don't You Get It specifically looks at people over three generations of the same family and others as well who have lived with APD. It demonstrates the struggles that these people went through and shows how they worked and overcame their problems in communicating and learning. If you or anyone you know has even a mild case of an Auditory Processing Disorder then this is the handbook for you.

Alphabet Kids - From ADD to Zellweger Syndrome Robbie Woliver, 2008-12-15. Alphabet Kids have disorders that are often concurrent, interconnected or mistaken for one another for example the frequent combination of ASD, OCD, SID and ADHD. Woliver covers 70 childhood disorders providing information on causes, cures, treatments and prognoses. Chapters include a list of signs and symptoms and true life stories.

The Parents' Guide to Specific Learning Difficulties Veronica Bidwell, 2016-05-19. From dyslexia to ADHD, from poor working memory to slow visual processing. Specific Learning Difficulties (SpLDs) represent real differences in the way children learn. This book sets out to demystify SpLDs and provide practical strategies to support and motivate children throughout their education.

The Post-Adoption Blues Karen J. Foli, John R. Thompson, 2004-08-07. Over 150,000 people adopt children each year and more than 2 million parents are now raising adopted children and grandchildren. While the path to parenting through adoption is rich with rewards and fulfillment it's not without its bumps. This compassionate, illuminating and ultimately uplifting book is the first to openly recognize the very normal feelings of stress that adoptive families encounter as they cope with the challenges and expectations of their new families. Where do parents turn when the waited-for bonding with their adopted child is slow to form? When they find themselves grieving over the birth child they couldn't have? When the child they so eagerly welcomed into their home arrives with major unexpected needs? Until now adoptive parents have had to struggle silently with their feelings which can range

from flutters of anxiety to unbearable sadness At last Karen J Foli a registered nurse and her husband John R Thompson a psychiatrist lift the curtain of secrecy from Post Adoption Depression Syndrome PADS Drawing on their own experience as adoptive parents as well as interviews with dozens of adoptive families and experts in the field the couple offers parents the understanding support and concrete solutions they need to overcome post adoption blues and open their hearts to the joy adoption can bring

Enhancing Communication Skills of Deaf & Hard of Hearing Children in the Mainstream
James J. Mahshie, 2005 With many children who are deaf or hard of hearing now integrated in mainstream classroom settings speech language pathologists and school based clinicians are encountering this population in growing numbers This book is designed to help clinicians who may have little or no experience with this population to understand its unique communication needs and develop clinical skills for working with them It takes a holistic view of children who are deaf or hard of hearing and stresses the child as a communicator rather than focusing on the disorder itself and provides a useful framework for viewing and assessing children s communication abilities and goals at all stages of language development It also includes specific assessment and treatment techniques to help develop and improve communication skills in order to maximize this populations potential for learning
