

Manual Assembly Lines

- Used in high-production situations where the work can be divided into small tasks (work elements) and the tasks assigned to the workstations on the line.
- By giving each worker a limited set of tasks repeatedly, the worker becomes a specialist in those tasks and perform more quickly.

Transfer of Work Between Workstations

1. *Nonmechanical Lines:* Parts are passed from station to station by hand. Problems are:

- Starving at stations
- Blocking of stations

As a result, cycle times vary. Buffer stocks are used to overcome.
