## **Liquid Modernity Bauman Summary:**

Liquid Modernity Zygmunt Bauman, 2013-07-10 In this new book Bauman examines how we have moved away from a heavy and solid hardware focused modernity to a light and liquid software based modernity This passage he argues has brought profound change to all aspects of the human condition The new remoteness and unreachability of global systemic structure coupled with the unstructured and under defined fluid state of the immediate setting of life politics and human togetherness call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history This book is dedicated to this task Bauman selects five of the basic concepts which have served to make sense of shared human life emancipation individuality time space work and community and traces their successive incarnations and changes of meaning Liquid Modernity concludes the analysis undertaken in Bauman's two previous books *Globalization The Human Consequences* and *In Search of Politics Together* these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today **Higher Education in**

**Liquid Modernity** Marvin Oxenham, 2013-10-28 Based in sociologist Zygmunt Bauman's theory of liquid modernity this volume describes and critiques key aspects and practices of liquid education education as market driven consumption short life span of useful knowledge overabundance of information through a systematic comparison with ancient Greek *paideia* and medieval university education producing a sweeping analysis of the history and philosophy of education for the purpose of understanding current higher education positing a more holistic alternative model in which students are embedded in a learning community that is itself embedded in a larger society If liquid modernity has left a vacuum where according to Bauman the pilot's cabin is empty this volume argues that no structure is better positioned to fill this vacuum than the university and outlines a renewed vision of social transformation through higher education *Liquid Sociology* Mark Davis, 2016-05-13 Zygmunt Bauman's liquid sociology confronts the awesome task of reminding individual men and women that an alternative way of living together is within our eminent capabilities if only we start to think differently about our world The metaphor of liquidity which has become such a prominent feature of his writings since 2000 provides us with just such a new interpretation with a novel way of seeing Each chapter in this unique collection takes seriously Bauman's analysis of modernity as liquid throwing new light upon global social problems as well as opening up a space for assessing the nature of Bauman's contribution to sociology and for understanding what may be gained and lost by embracing an artistic sensibility within the social sciences With contributions from internationally renowned scholars this book will appeal to all those interested in Bauman's work especially within sociology social political and cultural theory and to anyone curious about the value of metaphor in interpreting the social world *Introduction to Contemporary Social Theory* Anthony Elliott, Charles Lemert, 2014-02-10 In this comprehensive stylish and accessible introduction to contemporary social theory Anthony Elliott and Charles Lemert examine the major theoretical traditions from the Frankfurt School to globalization and beyond When

**Unfolding the Cards** Ian Damerell, 2015-03-03 These essays attempt to confront the effect of years of postmodernity and its promotion of individuality at the cost of solidarity and communal spirit In the wake of this it suggests possible frameworks for an art study that restores a certain focus on communal spirit It proposes too that art study's fragile position in contemporary society is a consequence of over commercialisation and its resultant surface values Consumerist and corporate ideology encourage the consumer individual's self realisation seemingly divorced from communal interests Within this isolation lies the potential breakdown of ethics Therefore I dream of a kinder society i.e. one where we

are engaged in realising the community as its citizens This is not blind obedience but in a spirit of contributing to a whole society More specifically it means allowing and to a degree maintaining art study as a sphere of possibilities for budding citizen artists It is envisaging art study as a discursive arena and creating an academic space that allows for art's main contribution the dislodging of the so called proper i e entrenched doctrine I believe that art study can contribute to the improving of society in the main because art enacts a different sharing of the sensible

Elasticized Ecclesiology Ulrich Schmiedel, 2017-01-17 This study confronts the current crisis of churches In critical and creative conversation with the German theologian Ernst Troeltsch 1865-1923 Ulrich Schmiedel argues that churches need to be elasticized in order to engage the other Examining contested concepts of religiosity community and identity Schmiedel explores how the closure of church against the sociological other corresponds to the closure of church against the theological other Taking trust as a central category he advocates for a turn in the interpretation of Christianity from propositional possession to performative project so that the identity of Christianity is done rather than described Through explorations of classical and contemporary scholarship in philosophy sociology and theology Schmiedel retrieves Troeltsch's interdisciplinary thinking for use in relation to the controversies that encircle the construction of community today The study opens up innovative and instructive approaches to the investigation of the practices of Christianity past and present Eventually church emerges as a work in movement continually constituted through encounters with the sociological and the theological other

**Professional Responsibility** Ciaran Sugrue, Tone Solbrekke, 2014-06-23 What does professional responsibility entail in an increasingly insecure unpredictable and de regulated world This is the core question addressed in this text The point of departure for the various contributions is that professional responsibility is a way of being in the world that includes a particular mandate to behave in a manner consistent with moral and societal obligations as a professional Increasingly however there is a lack of consensus as to what such mandates imply and even more dissensus as to what appropriate exercise of responsibility entails One of the distinctive features of this book is the manner in which it combines normative and empirical dimensions It moves beyond dualistic perspectives to create a more inclusive conversation on professional responsibility In the face of increasing complexity of professional work professional responsibility remains open to further development The book signals direction for the development of professional responsibility and while seeking to give direction to ongoing deliberations avoids the pitfalls of performativity

The chapters are grounded in a variety of disciplinary perspectives and traverse various professional boundaries in a self reflexive manner to create more inclusive transformative and generative narratives on professional responsibility This is achieved by Focusing on normative dimensions of professional work and combining these with a focus on empirical aspects of professional practice in a variety of setting and Recognising the inevitable tensions between personal trust and responsibility and largely depersonalised policies and strategies of quality control when normative and empirical aspects of professional responsibility are situated within their policy environments The concluding narrative moves beyond deconstruction complexity and critique of these considerations to a construction of new imagined horizons of professional responsibility from theoretical conceptual and practical perspectives This text sets out to transform professional responsibility through a re configuration of its constituent elements in imaginative and creative ways and by indicating the real world import of re charting the field
