The Architecture of Psychoanalysis Jane Rendell,2017-03-01 In this thought provoking book Jane Rendell explores how architectural space registers in psychoanalysis She investigates both the inherently spatial vocabulary of psychoanalysis and ideas around the physical setting of the psychoanalytic encounter with reference to Sigmund Freud D W Winnicott and Andre Green Building on the innovative writing methods employed in Art and Architecture and Site Writing she also addresses the concept of architecture as social condenser a Russian constructivist notion that connects material space and community relations Tracing this idea s progress from 1920s Moscow to 1950s Britain Rendell shows how interior and exterior meet in both psychoanalysis and architectural practice Illuminating a novel field of interdisciplinary enquiry this book breathes fresh life into notions of social space

Architecture of Life Alla Vronskaya,2022-08-23 Explores how Soviet architects reimaged the built environment through the principles of the human sciences During the 1920s and 1930s proponents of Soviet architecture looked to various principles within the human sciences in their efforts to formulate a methodological and theoretical basis for their modernist project Architecture of Life delves into the foundations of this transdisciplinary and transnational endeavor analyzing many facets of their radical approach and situating it within the context of other modernist movements that were developing concurrently across the globe Examining the theories advanced by El Lissitzky Moisei Ginzburg and Nikolay Ladovsky as well as those of their lesser known colleagues this illuminating study demonstrates how Soviet architects of the interwar period sought to mitigate Fordist production methods with other ostensibly more human oriented approaches that drew on the biological and psychological sciences Envisioning the built environment as innately connected to social evolution their methods incorporated aspects of psychoanalysis personality theory and studies in spatial perception all of which were integrated into an ideology that grounded functional design firmly within the attributes of the individual A comprehensive overview of the ideals that permeated its expanded project Architecture of Life explicates the underlying impulses that motivated Soviet modernism highlighting the deep interconnections among the ways in which it viewed all aspects of life both natural and manufactured

Museum Space Kali Tzortzi,2016-03-09 Museums are among the iconic buildings of the twenty first century as remarkable for their architectural diversity as for the variety of collections they display But how does the architecture of museums affect our experience as visitors This book proposes that by seeing space as common ground between architecture and museology and so between the museum building and its display we can

illuminate the individuality of each museum and the distinctive experience it offers for example how some museums create a sense of personal exploration while others are more intensely didactic and how the visit in some cases is transformed into a spatial experience and in other cases into a more social event The book starts with an overview of the history of museum buildings and display strategies and a discussion of theoretical and critical approaches It then focuses on specific museums as in depth case studies and uses methods of spatial analysis to look at the key design choices available to architects and curators and their effects on visitors behaviour Theoretically grounded methodologically original and richly illustrated this book will equip students researchers and professionals in the fields of architecture museum studies curating exhibition design and cultural studies with a guide for studying museums and a theoretical framework for their interpretation **New**

Marks, 2020-11-10 In this sweeping history Steven Marks tells the fascinating story of how Russian figures ideas and movements changed our world in dramatic but often unattributed ways On Europe's periphery Russia was an early modernizing nation whose troubles stimulated intellectuals to develop radical and utopian alternatives to Western models of modernity These provocative ideas gave rise to cultural and political innovations that were exported and adopted worldwide Wherever there was discontent with modern existence or traditional societies were undergoing transformation anti Western sentiments arose Many people perceived the Russian soul as the antithesis of the capitalist imperialist West and turned to Russian ideas for inspiration and even salvation Steven Marks shows that in this turbulent atmosphere of the past century and a half Russia's lines of influence were many and reached far Russia gave the world new ways of writing novels It launched cutting edge trends in ballet theater and art that revolutionized contemporary cultural life The Russian anarchist movement benignly shaped the rise of vegetarianism and environmentalism while also giving birth to the violent methods of modern terrorist organizations Tolstoy's visions of nonviolent resistance inspired Gandhi and the U S Civil Rights movement at the same time that Russian anti Semitic conspiracy theories intoxicated right wing extremists the world over And dictators from Mussolini and Hitler to Mao and Saddam Hussein learned from the experiments of the Soviet regime Moving gracefully from Moscow and St Petersburg to Beijing and Berlin London and Luanda Mexico and Mississippi Marks takes us on an intellectual tour of the Russian exports that shaped the twentieth

century The result is a richly textured and stunningly original account of the extent to which Russia as an idea and a producer of ideas has contributed to the making of the modern world Placing Russia in its global context the book better our understanding of the anti Western strivings that have been such a prominent feature of recent history **Avant-Garde Film**,2015-07-14 This volume on avant garde film has emerged as part of a wider reassessment of 20th century avant garde art literature and film carried out in the framework of a research project at the University of Edinburgh It paves the way for a fresh assessment of avant garde film and develops its theory as an integral part of a newly defined conception of the avant garde as a whole by closing the gap between theoretical approaches towards the avant garde as defined on the basis of art and literature on the one hand and avant garde cinema on the other It gathers contributions by the most esteemed scholars in the field of avant garde studies relating to the classical avant garde cinema of the 1920s to new trends emerging in the 1950s and 1960s and to the impact that innovative technologies have recently had on the further development of avant garde and experimental film The contributions reflect the broad range of different moving image media that make up what we refer to today simply as film at the same time as reconsidering the applicability of the label avant garde to offer a comprehensive and updated framework that will prove invaluable to scholars of both Moving Image Studies and Art History disciplines
