The combination of this book and its associated virtual computer is fantastic. Experience over the last fifty years has shown me that there's only one way to truly understand how computers work, and that is to learn one computer and its instruction set, no matter how simple or primitive, from the ground up. Once you fully comprehend how that simple computer functions, you can easily extrapolate to more complex machines. Fred Hudson, retired engineer/scientist. This book, along with the virtual DIY Calculator, is an incredibly useful teaching and learning tool. The interesting trivia nuggets keep you turning the pages to see what's next. Students will have so much fun reading the text and performing the labs that they won't even realize they are learning. Michael Haghighi, Chairperson of the Business and Computer Information Systems Division, Calhoun Community College, Alabama. At last, a book that presents an innovative approach to the teaching of computer architecture.
