Frank J. Malina, 1974 **Canada's Bridge Warriors** Roy Hughes, 2007 The Origins of Company Law Victoria Barnes, Jonathan Hardman, 2024-12-26 This book provides histories of company law uniting a variety of approaches from law business and management economics and history What were the origins of company law How did it begin Why did it change There is no single answer to these questions Each discipline and sub discipline has a different approach and method that brings different facets of study to the fore This multidisciplinary endeavour is immensely valuable for debates taking place now among policy makers in the UK and US about returning to historic modes of company regulation The book brings together Anglo American scholarship that will not only shed greater light on the history of company law but also influence contemporary debates about our ability to return to or learn from the past Historical research has great value here because it not only generates new insights into the evolution of present legal rules but also corrects misunderstandings and misapprehensions about them The book shows how this body of law developed to become the rules with which we are now familiar It showcases antecedents of present debates reveals regulatory lessons from previous legal regimes identifies instances of path dependency unpicks pivotal legal events and explains drivers for legal change The chapters re evaluate the history of company law and the knowledge gathered here will inform the law making and policy making agenda

Kaleidophonic Modernity Brett Brehm, 2023-02-21 What stories remain hidden behind one of the most significant inventions of the nineteenth century Kaleidophonic Modernity reexamines the development of mechanical sound recording technology by charting the orbits of writers scientists and artists in France and the United States Working between comparative literature the history of science and urban studies Brehm builds a bridge between visual culture and sound studies Kaleidophonic Modernity places the poet and inventor Charles Cros and his lover the celebrated concert pianist and salonni re Nina de Villard at the heart of modern aesthetic and scientific vanguards Cros s scientific endeavors ranged from

color photography to telecommunications to mechanical sound reproducibility In his poetry the Surrealists found an ancestor and inspiration His literary and scientific works prove startling and relevant to predicaments of technological media in his own time and ours For nearly twenty years Nina de Villard presided over a supremely daring intellectual salon There she welcomed manifold literary artistic and musical luminaries into a veritable crucible of the artistic avant garde and precursor to the famous Chat Noir cabaret Together these two forgotten but pivotal figures Cros and Villard help reframe our thinking on Edgar Allan Poe Charles Baudelaire and Walt Whitman icons of urban modernity who can now be seen and heard in a kaleidophonic light one that offers a compelling new perspective on modern mediascapes In elaborating this transatlantic phenomenon Kaleidophonic Modernity illuminates the prehistory of the phonograph as it intersects with the aesthetics of sound reproducibility Franco American literary exchange Poe s aesthetic and intellectual legacy the sounds of modern cities and technologies and the genealogy of audiovisual experimentation found in such movements as Dada Futurism and the sound art of today

Memoirs Taihoku Teikoku Daigaku. Ri-nogakubu,1939 *Artifacts in Behavioral Research* Robert Rosenthal,Ralph L. Rosnow,2009-08-03 This new combination volume of three books in one dealing with the topic of artifacts in behavioral research was designed as both introduction and reminder It was designed as an introduction to the topic for graduate students advanced undergraduates and younger researchers It was designed as a reminder to more experienced researchers in and out of academia that the problems of artifacts in behavioral research that they may have learned about as beginning researchers have not gone away For example problems of experimenter effects have not been solved Experimenters still differ in the ways in which they see interpret and manipulate their data Experimenters still obtain different responses from research participants human or infrahuman as a function of experimenters states and traits of biosocial psychosocial and situational origins Experimenters expectations still serve too often as self fulfilling prophecies a problem that biomedical researchers have acknowledged and guarded against better than have behavioral researchers e g many biomedical studies would be considered of unpublishable quality had their experimenters not been blind to experimental condition Problems of participant or subject effects have also not been solved We usually still draw our research samples from a population of volunteers that differ along many dimensions from those not finding their way into our research Research participants are still often suspicious of experimenters intent try to figure out what experimenters are after and are concerned about what the experimenter thinks of them
