Africa beyond Liberal Democracy Reginald M.J. Oduor, 2022-06-21 A 2023 Choice Reviews Outstanding Academic Title *Africa beyond Liberal Democracy* In Search of Context Relevant Models of Democracy for the Twenty First Century explores possible future trajectories of democratization on the continent At the dawn of political independence in the late 1950s and early 1960s many countries in Africa set out with liberal democratic constitutions However these were quickly dismantled by civilian regimes that turned their countries into one party autocracies or by military coups that set aside the constitutions altogether The 1990s saw an attempt at reverting to competitive multi party politics through the so called second generation constitutions but these are again being dismantled by civilian autocracies and military juntas In this collection edited by Reginald M J Oduor African and Africanist scholars examine the view that what has failed in Africa is liberal democracy rather than democracy as such because liberal

democracy arose in an individualist socio political Western context that is significantly different from the communalist milieu of African societies The contributors from a variety of disciplines in the humanities and social sciences and based in South Africa Zimbabwe Kenya Uganda Tanzania Nigeria Ghana India Sweden and Finland present a range of perspectives on possible directions for context relevant models of democracy in the various countries of Africa in the twenty first century

Martin Bernal,2020-02-14 Winner of the 1990 American Book Award What is classical about Classical civilization In one of the most audacious works of scholarship ever written Martin Bernal challenges the foundation of our thinking about this question Classical civilization he argues has deep roots in Afroasiatic cultures But these Afroasiatic influences have been systematically ignored denied or suppressed since the eighteenth century chiefly for racist reasons The popular view is that Greek civilization was the result of the conquest of a sophisticated but weak native population by vigorous Indo European speakers Aryans from the North But the Classical Greeks Bernal argues knew nothing of this Aryan model They did not see their institutions as original but as derived from the East and from Egypt in particular This long awaited third and final volume of the series is concerned with the linguistic evidence that contradicts the Aryan Model of ancient Greece Bernal shows how nearly 40 percent of the Greek vocabulary has been plausibly derived from two Afroasiatic languages Ancient Egyptian and West Semitic He also reveals how these derivations are not limited to matters of trade but extended to the sophisticated language of politics religion and philosophy This evidence according to Bernal greatly strengthens the hypothesis that in Greece an Indo European speaking population was culturally dominated by Ancient Egyptian and West Semitic speakers Provocative passionate and colossal in scope this volume caps a thoughtful rewriting of history that has been stirring academic and political controversy since the publication of the first volume **The Literary Digest** Edward Jewitt Wheeler,Isaac Kaufman Funk,William Seaver Woods,Arthur Stimson Draper,Wilfred John Funk,1911
