Linde Hydraulic Control (LHC)

Digital electro-hydraulic controller

Instead of a control unit, an integrated module has taken the place of the control unit. Instead of a hydraulic controller, a computer electronic controller is used. It has a very powerful microcontroller system, all control functions for the drive unit and the working hydraulics (2).

Adaptation to various trucks

The electronic control unit is capable of controlling trucks from a variety of series and with different drive systems. To use different truck parameters and sensors, each truck model has a code that uniquely identifies the truck.

Troubleshooting

The processor of the electronic control unit analyzes analog and digital signals. The processor recognizes digital signals and system errors, and displays an error message on the display module on the control interface. In addition, the control unit activates a variety of functions according to the error's highest priority.

- Working light failure
- Recognition function of the manual emergency stop
- The truck brakes with automatic emergency stop and off the engine brake
- The manual brake on the emergency function, the manual emergency stop button is off
- An error code appears on the display

These functions can be activated by switching off the emergency stop and the engine brake. During a fault, the control unit shows whether the error is still present. If the error is no longer present, the truck returns to normal operation. If the error persists, the error code appears on the display and one of the measures listed above is carried out.

Changing the controller

4.1.1.1.1.1

Problems regarding component damage due to electrostatic discharge. Electrostatic damage is nothing dangerous and occurs if the controller is moved.

The controller is equipped with a "fingerprint" which is attached to the truck's main wiring harness. Communication takes place via CAN bus. The system unit number and the software version of the controller can be read out via the main diagnostic.

If the controller is replaced, the personal code must be transferred and the code adapted to the code format. All necessary information is available on the code format.
