CompTIA Linux+ Certification Study Guide (2009 Exam) Chris Happel, Brian Barber, Graham Speake, Terrence V. Lillard, 2009-10-21
CompTIA Linux Certification Study Guide 2009 Exam offers a practical guide for those interested in pursuing a Linux certification. It covers the required content as specified in CompTIA's exam objectives and has been shaped according to the respective exam experiences of the authors. Careful attention has been paid to ensure that each exam objective has been covered and that each term in the list at the end of the objectives has been included in a glossary at the end of the book. The book has been designed in such a way that readers will start with installing Linux and end up with a useable and secure Linux workstation and server that is supported and managed. Key topics discussed include booting Linux, how to use the BASH command line interpreter (CLI) or BASH shell, and how to install applications to transform the Linux system into a productive tool. The remaining chapters cover the configuration of Linux as a workstation and as a server, security objectives, and the care and feeding of a Linux system. Each chapter ends with 15 exam questions along with a corresponding answer key. Covers everything from test-taking techniques to advanced topics, keeping the beginner and intermediate IT professional in mind. Layout of the guide parallels the 2009 Linux objectives for ease of study. More than just a book, this kit includes a self-test, tiered questions, and two practice exams.

Asghar Ghori, 2017-10-10

The CompTIA Linux LPIC 1 Training and Exam Preparation Guide First Edition is a comprehensive resource designed and written with one fundamental goal in mind: teach Linux in an easy and practical manner while preparing for the Linux LPIC 1 exams. This book provides an in-depth coverage of all official exam objectives. This book is organized in two parts: Part One covers LX0-103/101-400 exam objectives and Part Two covers LX0-104/102-400 exam objectives. The book includes hands-on examples, step-by-step exercises, chapter-end review of concepts, files, and commands learned, and 790 challenging practice questions. This book uses learn-by-doing methodology. It begins with guidance on how to download a virtualization software and two Linux distribution versions and then provides instructions on how to create VMs and install Linux in them to set up a lab environment for hands-on learning. Throughout the book, appropriate command prompts are employed to identify the lab system and user to run a command. Each command and task presented in the book was actually performed and tested on lab systems. Followed by the lab environment setup in Part One, the book presents the essentials of Linux, including interaction with Linux basic commands, file management, permissions, ownership, linking, searching, special permissions, editing, filter programs, regex, shell features, and process handling. Subsequent topics focus on system administration, including shared libraries, Debian and RPM package management, system boot, and initialization hardware.

management kernel modules storage partitioning file system creation and repairs quota handling and swap space administration This brings Part One to an end and you should be able to take the quiz in Appendix A to test your readiness for the LX0 103 101 400 exam Part Two covers all the objectives for the LX0 104 102 400 exam It covers shell scripts with a presentation and line by line analysis of several scripts Building a simple SQL database and performing queries comes next A detailed comprehension of local authentication files user creation password aging and shell startup files follows The book covers networking concepts reference models and terms that accompany exercises on interface configuration hostname change and route management A discussion of network testing and debugging tools is furnished and their usage is demonstrated followed by topics on internationalization localization time synchronization name resolution X Window display desktop managers accessibility options printer and print queue administration task scheduling system logging system and service access controls emailing and email aliasing searching for special files and so on This brings Part Two to an end and you should be able to take the quiz in Appendix C to test your readiness for the LX0 104 102 400 exam Highlights 100% coverage of ALL official exam objectives version 4 0 Enumerated and descriptive knowledge areas under exam objectives to assist in identifying and locating them A summarized and convenient view showing exam objectives chapters they are discussed in associated weights the number of questions to expect on the real exam and other useful information Separate section on each exam 15 chapters in total 8 for LX0 103 101 400 and 7 for LX0 104 102 400 Detailed guidance on building lab environment 49 tested hands on exercises with explanation Numerous tested practical examples for clarity and understanding Chapter end one sentence review of key topics 790 single response multiple response and fill in the blank practice questions answers to test your knowledge of the material and exam readiness Equally good for self study and in class training
