Teaching of Instrumental Music Richard J. Colwell, Michael P. Hewitt, 2017-10-12 The Teaching of Instrumental Music Fifth

Edition introduces music education majors to basic instrumental pedagogy for the instruments and ensembles commonly found in the elementary and secondary curricula. It focuses on the core competencies required for teacher certification in instrumental music with the pervasive philosophy to assist teachers as they develop an instrumental music program based on understanding and respecting all types of music. Parts I and II focus on essential issues for a successful instrumental program presenting first the history and foundations followed by effective strategies in administrative tasks and classroom teaching. Parts III, IV, and V are devoted to the skills and techniques of woodwind, brass, and percussion and string instruments. In all, *The Teaching of Instrumental Music* is the complete reference for the beginning instrumental teacher commonly retained in a student's professional library for its unique and comprehensive coverage.

NEW TO THIS EDITION: Revision and updating of curriculum developments such as coordinating State Department of Education student learning objectives with the recent Every Student Succeeds Act (ESSA). New discussion of the NAfME National Standards as they relate to the teaching of instrumental music. Revamping of rehearsing instrumental ensembles chapters including new or expanded sections on programming, choosing quality music, and applying successful rehearsal techniques. Updates on references plus new discussion questions and websites and internet links. A chapter devoted to classroom guitar. Updates on the use of technology for teaching and learning music. More on healthy performance practice, marching band, and jazz band. Online materials located in the eResources section on the Routledge website.

Environmental and Energy Efficiency Evaluation Based on Data Envelopment Analysis (DEA) Ramon Sala-Garrido, María Molinos-Senante, 2021-05-06. Efficiency and productivity assessment are essential to ensure the long-term financial sustainability of countries' services and processes. In the last few years, there has been an increasing interest in the environmental effects of economic activities, and the need to assess the environmental and energy efficiency has been internationally recognized. Energy and environmental efficiency assessments of decision-making units (DMUs) such as countries, utilities, processes, and services are relevant and have strong implications for companies, regulators, stakeholders, policy makers, and customers. To improve both the decision-making process and the management of DMUs, fundamental and practical knowledge about energy and environmental efficiency and productivity is essential.
