The new edition contains two entirely new chapters: Relativity as the concluding chapter of the regular version and Particles and the Cosmos as the concluding chapter of the extended version. New also are 16 essays distributed throughout the text on applications of physics to real world topics of student interest. Each essay is self-contained and is written by an expert in the topic. The body of the text contains more help in problem solving and the chapter sections are shorter making the material more accessible. There are more photos and diagrams than before including attention getting chapter head photos and captions. The number of worked examples has been increased as has the number of questions exercises and problems. In addition a thread of ideas from relativistic and quantum physics is weaved through the earlier chapters preparing the way for the later chapters *Fundamentals of Physics, , Student's Solutions Manual* J.
