minimizing exposure to infectious agents is far more effective than any treatment plan in the continued battle against viruses. Regardless of the preventative care you take, there are always times where treating an infection will be necessary. Traditionally, viral infection is fought by blending herbals that support the body's own natural defenses with those that act to kill the virus. Using a combination that blends both actions helps to minimize the duration and severity of any infection. Many herbs and oils act as natural immunostimulants and antiviral agents. Some of these natural products work as well as or even better than the products sold in your local pharmacy. Some of the items in your local pharmacy are even created based on the chemical constituents of plants you might have growing in your own yard. This guide contains antiviral agents that act as both disinfectants for infected air and surfaces and disease-fighting agents for the body. Both categories eliminate harmful viruses. It is important that you read the traditional uses and side effects of each plant and discuss any alternative treatment with a qualified herbalist or physician prior to choosing a natural product.

The Encyclopedia of Herbs and Spices P. N. Ravindran, 2017-12-28. The *Encyclopedia of Herbs and Spices* provides comprehensive coverage of the taxonomy, botany, chemistry, functional properties, medicinal uses, culinary uses, and safety issues relating to over 250 species of herbs and spices. These herbs and spices constitute an important agricultural commodity; many are traded globally and are indispensable for pharmaceuticals, flavouring foods and beverages, and in the perfumery and cosmetic industries. More recently, they are increasingly being identified as having high nutraceutical potential and important value in human healthcare. This encyclopedia is an excellent resource for researchers, students, growers, and manufacturers in the fields of horticulture, agriculture, botany, crop sciences, food science, and pharmacognosy.

Handbook of Phytochemical Constituents of Grass, Herbs and Other Economic Plants James A. Duke, 2017-12-06. The *CRC Handbook of Phytochemical Constituents of GRAS Herbs and Other Economic Plants* is a unique catalog that includes more than 15,000 phytochemical constituents from over 1,000 higher plant species. This volume covers all of the generally recognized as safe (GRAS) herbs and at least 250 important food and medicinal plants. Each entry features the scientific name, one or more common names, a listing of phytochemical constituents, a single datum or range of quantitative data (wet weight to dry weight in parts per million), two-letter abbreviations identifying the plant part, and three-letter abbreviations indicating the source(s) of the data. The extraordinary amount of data compiled into an easy-to-use tabular format makes the *CRC Handbook of Phytochemical Constituents of GRAS Herbs and Other Economic Plants* a volume useful to all pharmacologists, toxicologists, nutritionists, pharmacognosists, and food scientists.
