Classroom Assessment in Multiple Languages Margo Gottlieb, 2020-12-09

What if multilingual learners had the freedom to interact in more than one language with their peers during classroom assessment What if multilingual learners and their teachers in dual language settings had opportunities to use assessment data in multiple languages to make decisions Just imagine the rich linguistic academic and cultural reservoirs we could tap as we determine what our multilingual learners know and can do Thankfully Margo Gottlieb is here to provide concrete and actionable guidance on how to create assessment systems that enable understanding of the whole student not just that fraction of the student who is only visible as an English learner With *Classroom Assessment in Multiple Languages* as your guide you ll Better understand the rationale for and evidence on the value and advantages of classroom assessment in multiple languages Add to your toolkit of classroom assessment practices in one or multiple languages Be more precise and effective in your assessment of multilingual learners by embedding assessment as for and of learning into your instructional repertoire Recognize how social emotional content and language learning are all tied to classroom assessment Guide multilingual learners in having voice and choice in the assessment process Despite the urgent need assessment for multilingual learners is generally tucked into a remote chapter if touched upon at all in a book the number of resources narrows even more when multiple languages are brought into play Here at last is that single resource on how educators and multilingual learners can mutually value languages and cultures in instruction and assessment throughout the school day and over time We encourage you to get started right away Margo Gottlieb has demonstrated why the field particularly the field as it involves the teaching of multilingual learners needs another assessment book particularly a book like this *Classroom Assessment in Multiple Languages* quite likely could serve as a catalyst toward the beginning of an enlightened discourse around assessment that will benefit multilingual learners Kathy Escamilla

gain a clear vision of what excellence in assessment looks like and what it takes to achieve that vision The specific competencies leaders need to support assessment FOR learning are identified with activities and resources to help them learn and apply the skills Written for use by individuals or group study Publisher s website **Mathematics Assessment** Florence Glanfield, Jean Kerr Stenmark, William S. Bush, 2003 Both practical and inspirational the Classroom Assessment for School Mathematics K 12 Series of handbooks and casebooks foster insights into what students know what they can do and how they think mathematically The ideas in this book are great starting points for thinking about assessment Readers will find advice about getting started in assessment selecting developing and managing assessment tools and using the results Samples of good assessment tasks scoring rubrics checklists observation forms and sources for tasks and more literature are also included **Classroom Assessment: The Unconventional Guide to Classroom Assessment: Principles and Practices: The Ultimate Guide to Effective Classroom** Mohamed A. Ansary, 2018-11-29 As a teacher your duty toward your class is not limited to teaching It also includes knowing which students are weak in which subjects and finding ways to assess this Once you are able to do this you will find that your students respond better to your classes and that you can tailor your classes to their needs In this volume you will find many teaching assessment principles and practices that may not be conventional However they do work How do I know I have been teaching classrooms for most of my career and the techniques have all been tried and tested They also apply to kids of most ages although your technique is tailored to their ability level Thus whereas you would use written work in some of the exercises younger kids may be encouraged to answer your assessment questions in picture format Not only do you gain the respect of your class but they also feel that their voices are being listened to Once you cross that teacher student barrier in this way the response that you get from children is always going to be more successful You will know from the assessments where you need to place more or less emphasis Children are all different and learn differently It s hard when you have a class of kids in front of you to level your teaching to fit all of them However when you learn assessment techniques that are effective regardless of whether they are established or recognized you win the battle of wits and are able to assess your class accurately The kids within your class deserve your best attention Perhaps you think that you are giving them this but the unconventional assessments shown within the pages of this book may demonstrate that you are not I hope so because it will keep you on your toes learning the different styles of learning and being able to cater for them When you know how to do that you improve your overall score values in your class and it is noticed by a school that your particular method of teaching has value You will also find that your principal is only too happy to oblige you with extra props and the potential of outings if you explain in such a way that he will see the benefit to the children I hope that the book gives you sufficient information to up the ante in the classroom and helps you to bring out your gift of teaching in such a manner that your assessments help you to give that same value to each child in your class Knowing their strengths and weaknesses is essential and once you do you can use this to your advantage Remember they are

not the only ones with weaknesses and strengths Teachers have these too and addressing them will make you a stronger teacher and a more respected one Classroom Assessment Techniques Kathryn Patricia Cross,1988 Prepared for the National Center for Research to Improve Postsecondary Teaching and Learning
