**Handbook of International Trade Agreements** Robert E. *The Securitisation of Climate Change and the Governmentalisation of Security* Franziskus von Lucke, 2020-10-01

This book provides an in depth analysis of the securitisation of climate change in the US Germany and Mexico and offers a rethinking of securitisation theory. Resting on a Foucauldian governmentality approach it discusses how different climate security discourses have transformed the political handling of climate change and affected policies practices and institutions. Going beyond the literature's predominant focus on the global level it gives a fine grained examination of the political and institutional changes in different national contexts. Drawing on the governmentalisation of security the book develops a new understanding of securitisation that focuses on the role of power. In doing so it provides new insights into the transformative potential of linking climate change to security but also highlights the political and normative pitfalls of securitisation. In this important book Franziskus von Lucke provides a theoretically sophisticated and empirically rich account of the relationship between security and climate change. Developing a Foucauldian inspired account of securitization the book rejects blanket or universal claims about the climate change security relationship instead insisting on the need to critically examine how the securitization of climate change plays out in particular empirical contexts. Exploring the cases of the US Germany and Mexico von Lucke points to distinctive dynamics of securitization in these settings with different implications for the practices these in turn encourage. Ultimately this book constitutes an important addition to literature on the relationship between climate change and security while developing a distinct and nuanced account of securitization that will be of interest to a wide range of scholars of security in international relations.

Associate Professor Matt McDonald is a Reader in International Relations at the University of Queensland Australia. In 2019 a number of states and other actors notably the European Union have made climate emergency declarations. It is therefore more important than ever to understand what the securitization of the climate means. That is Who can securitize? What security measures are likely deemed legitimate by relevant audiences? How does securitization affect the population within and outside a securitizing state? And perhaps most importantly of all will it succeed?

Franziskus von Lucke's carefully researched book offers answers to all of these questions and many others. Besides von Lucke proceeds by examining with the US Mexico and Germany three real life empirical cases of climate securitization. Each one provides unique insights that enable a fuller understanding of climate security. Accessibly written this is a must read for scholars and practitioners alike.

Dr Rita Floyd University of Birmingham UK author of *The Morality of Security: A theory of just Securitization* CUP 2019. With great empirical detail and conceptual clarity the book compares discourses and practices of climate security in different contexts. An essential reading for anyone interested in international climate politics.

securitization theory governmentality and the notion of power in International Relations Dr Delf Rothe Institute for Peace Research and Security Policy Hamburg at the University of Hamburg Germany *Handbook of BRICS and Emerging Economies* P. B. Anand, Shailaja Fennell, Flavio Comim, 2021 Ever since Jim O'Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies with some even proclaiming that the promise of the BRICS comprising Brazil Russia India China and South Africa is over However the so called arranged marriage still seems to be working well with the club having become a formal international forum with summit declarations ministerial meetings and numerous BRICS wide fora Is this euphoria misplaced Is there a BRICS model of economic and human development Are inequalities increasing and is this the denouncement of the economic successes The Handbook of BRICS and Emerging Economies presents a comprehensive and multi faceted analysis of the BRICS countries and other emerging economies exploring their economic social environmental and governance dimensions and other challenges It brings together multi disciplinary perspectives from more than fifty authors to examine how education contributed to the emergence of BRICS how BRICS are impacting African economies and how other emerging economies including Chile Mexico Turkey and others in Africa and Central Asia compare It observes the impact of governance challenges both within individual countries and in the forum for co operation amongst them what issues related to gender and identity based violence are prevalent and what the security implications are and the role of BRICS is in contributing to peace keeping operations China's Belt and Road Initiative at Ten Robert Looney, 2022-11-23 This volume assesses China's Belt and Road Initiative BRI as it approaches its tenth year in operation The programme has gone through a difficult transition since its inception in 2013 with an environment developing in a way utterly unanticipated by Chinese decision makers Despite pragmatic adjustments to the BRI the lack of a firm empirical base has impeded the BRI and led to its demise in many countries With the accumulation of nearly ten years of project and economic data it is possible to make an in depth assessment of the BRI For this purpose the study examines the infrastructure component of the BRI in 39 countries stretching from the Americas to Oceania and finally South Asia The study finds a strong relationship between a country's progress in improved governance and the quality of its infrastructure Countries that have benefited from the BRI have simultaneously achieved progress in governance areas such as the rule of law and control of corruption By not emphasizing improved governance structures China condemns many of its partners to failure Researchers students and economic development specialists from Latin America to South Asia and Oceania will find this study a useful departure from the volumes of anecdotal BRI assessments *Global Political Economy* Theodore H.
