**Handbook of Motivation and Cognition** Richard M. Sorrentino, Edward Tory Higgins, 1986 The apparent success of cognitive principles in accounting for several behaviors has led social psychologists to question the need for motivations and other hot dispositional constructs In their place they postulate nonmotivational cold cognitions Behavioral variations between individuals are thus reduced to differences in information processing abilities while biases and other apparently motivated behaviors are explained on the faulty computer model However as many cognitive psychologists now acknowledge this mechanistic theory fails to tie the processing of information to the performance of actions

Handbook of Motivation and Cognition: The interpersonal context Edward Tory Higgins, Richard M. Sorrentino, 1986 Volume 1 challenges the prevailing hot cold either or dichotomy and proposes instead the warm look a synergistic approach to the roles of hot motivations and cold cognitions in the production of behavior Highly acclaimed as a groundbreaking work Contemporary Psychology called it an extremely valuable contribution to the field Unique as a handbook rather than summarizing an existing body of knowledge it attempts to define and shape an emerging field Volume 2 continues to emphasize both theory and research on the motivation cognition interface However the range of approaches has been widened to include clinical developmental political and cognitive

psychological as well as the social and personality perspectives prominent in the first volume Volume 3 like its acclaimed predecessors presents timely original work on the interface of motivation and cognition Rather than looking at the self affect and goals as primarily intrapersonal variables however Volume 3 shifts its concern to the role of motivation and cognition in interpersonal and intergroup behavior Reflecting an increasing awareness of the impact of intergroup strife in contemporary life leading researchers and theorists of social relations discuss topics including how we use others to further evaluate the self how the self affects our judgment of others the role of stereotyping and prejudices and how we evaluate and interact with ingroups and outgroups from book description Amazon com

**From Prejudice to Intergroup Emotions** Diane M. Mackie, Eliot R. Smith, 2016-01-28 The theories or programs of research described in the chapters of this book move beyond the traditional evaluation model of prejudice drawing on a broad range of theoretical ancestry to develop models of why when and how differentiated reactions to groups arise and what their consequences might be The chapters have in common a re-focusing of interest on emotion as a theoretical base for understanding differentiated reactions to and differentiated behaviors toward social groups The contributions also share a focus on specific interactional and structural relations among groups as a source of these differentiated emotional reactions The chapters in the volume thus reflect a theoretical shift from an earlier emphasis on knowledge about ingroups and outgroups to a new perspective on prejudice in which socially grounded emotional differentiation becomes a basis for social regulation
