Appraising Research in Second Language Learning Graeme Keith Porte, 2010 Designed for students of applied linguistics and second language acquisition on research training courses practising language teachers and those in training this combination textbook workbook is a set or recommended textbook on more than a hundred undergraduate and postgraduate courses worldwide Now in its second edition it remains the only book to provide specific advice and support to those wishing to learn a methodical approach to the critical analysis of a research paper It seeks to answer a current need in the literature for a set of

procedures that can be applied to the independent reading of quantitative research Innovative features of the workbook include awareness raising reading tasks and guided exercises to help develop and practise the critical skills required to appraise papers independently Through informed and constructive appraisal of others work readers themselves are shown how to become more research literate to discover new areas for investigation and to organise and present their own work more effectively for publication and peer evaluation This revised second edition sees a closer integration of the text and workbook and a number of additions to the text itself as well as further guided and unguided research appraisal exercises

data sets With its breadth of real world examples and accessible treatment of both theory and applications Statistical Analysis of Designed Experiments is a valuable book for experimental design courses at the upper undergraduate and graduate levels It is also an indispensable reference for practicing statisticians engineers and scientists who would like to further their knowledge of DOE

Dictionary Use in Foreign Language Writing Exams Martin East, 2008 This book provides an in depth analysis of what happens when intermediate level learners of a foreign language use a bilingual dictionary when writing Dictionaries are frequently promoted to people learning a foreign language Nevertheless teachers often talk about their students inability to use dictionaries properly especially when they write and this can be problematic This book paints a comprehensive picture of the differences a dictionary makes and brings out the implications for language learning teaching and testing practices It draws on research in which participants in three studies took writing tests in two test conditions with and without a dictionary They were also asked what they thought about the two test types Their performances and opinions were analyzed in a variety of ways Conclusions from the data highlight some of the practical issues to be kept in mind if we want to help foreign language learners to use bilingual dictionaries effectively when writing
