Training in a Global Society Richard H. Dana, James Allen, 2008-11-13 Cultural competence is more than an admirable goal it is an essential skill set for mental health professionals working in a diverse global society marked by crisis and trauma It is essential for clinicians to understand the intricate mix of history and self concept identity and tradition that are central not only for ameliorating psychological problems but to foster psychological health and well being As the definition of culture takes on broader meanings at once embracing multiple identities and increasing globalization Cultural Competency Training in a Global Society brings a vital perspective and practical understanding to clinical counseling and school psychologists as

well as to graduate students entering these fields By describing a comprehensive training model for professional education and practice in the United States with ethnic minority groups indigenous populations immigrants and refugees this book has relevance for other multicultural societies because the implications are multidisciplinary in focus and potentially international in scope The existing and emergent global multicultural populations described in this book represent the neglected human faces of economic globalization Among the topics covered Requirements for professional training in cultural competency Research basis for cultural competency training International resources and their usage in training and practice Multicultural assessment in the service of intervention Evaluating cultural competency training Principles of Multicultural Counseling and Therapy Uwe P. Gielen, Juris G. Draguns, Jefferson M. Fish, 2008-06-19 In an era of globalization characterized by widespread migration and cultural contacts psychologists counselors and other mental health professionals face a unique challenge how does one practice successfully when working with clients from so many different backgrounds Gielen Draguns and Fish argue that an understanding of the general principles of multicultural counseling is of great importance to all practitioners The lack of this knowledge can have several negative consequences during therapy including differences in expectations between counselor and client misdiagnosis of the client's concerns missed non verbal cues and the client feeling that she has been misunderstood This volume focuses on the general nature of cultural influences in counseling rather than on counseling specific ethnic groups Counseling practices from all over the world not just those of Western society are explored Bringing together the work of a diverse group of international experts the editors have compiled a volume that is not only concise and teachable but also an essential guidebook for all mental health professionals
