Decision Making in Service Industries Javier Faulin,Angel A. Juan,Scott E. Grasman,Michael J. Fry,2012-08-08 In real life scenarios service management involves complex decision making processes usually affected by random or stochastic variables Under such uncertain conditions the development and use of robust and flexible strategies algorithms and methods

can provide the quantitative information necessary to make better business decisions

Decision Making in Service Industries A Practical Approach explores the challenges that must be faced to provide intelligent strategies for efficient management and decision making that will increase your organization's competitiveness and profitability. The book provides insight and understanding into practical and methodological issues related to decision making processes under uncertainty in service industries. It examines current and future trends regarding how these decision making processes can be efficiently performed for better design of service systems by using probabilistic algorithms as well as hybrid and simulation based approaches. Traditionally many quantitative tools have been developed to make decisions in production companies. This book explores how to use these tools for making decisions inside service industries. Thus the authors tackle strategic tactical and operational problems in service companies with the help of suitable quantitative models such as heuristic and metaheuristic algorithms simulation or queuing theory. Generally speaking decision making is a hard task in business fields. Making the issue more complex most service companies problems are related to the uncertainty of the service demand. This book sheds light on these types of decision problems. It provides studies that demonstrate the suitability of quantitative methods to make the right decisions. Consequently this book presents the business analytics needed to make strategic decisions in service industries.

The FAP Model and Its Application in the Appraisal of ICT Projects F. Lefley, 2015-06-15 Based on the 2005 publication *The Financial Appraisal Profile Model* this book discusses how the FAP model can present an integrated process for the appraisal of financial and strategic benefits and the assessment of risk in ICT Information Communication Technology project proposals.

Cloud Data Centers and Cost Modeling Caesar Wu, Rajkumar Buyya, 2015-02-27 Cloud Data Centers and Cost Modeling establishes a framework for strategic decision makers to facilitate the development of cloud data centers. Just as building a house requires a clear understanding of the blueprints architecture and costs of the project building a cloud based data center requires similar knowledge. The authors take a theoretical and practical approach starting with the key questions to help uncover needs and clarify project scope. They then demonstrate probability tools to test and support decisions and provide processes that resolve key issues. After laying a foundation of cloud concepts and definitions the book addresses data center creation infrastructure development cost modeling and simulations in decision making each part building on the previous. In this way the authors bridge technology management and infrastructure as a service in one complete guide to data centers that facilitates educated decision making. Explains how to balance cloud computing functionality with data center efficiency. Covers key requirements for power management cooling server planning virtualization and storage management. Describes advanced methods for modeling cloud computing cost including Real Option Theory and Monte Carlo Simulations. Blends theoretical and practical discussions with insights for developers consultants and analysts considering data center development.
