

Safe Manual Handling

INTRODUCTION

LEGISLATION

More than a 100 European countries in the world have signed European and national laws on manual handling and lifting. These regulations are mostly in the workplace and for employers. The most important European Regulations (1984, 1986 and 1989) apply to most workplaces. However, some countries, for example, the Netherlands, have reduced the number of workers' compensation from these provisions.

TYPES OF INJURY

The back is a series of bones with a thin supporting cartilage between them and ligaments, which support the spine. There is a protection mechanism to warn you about potential harm to your back.

The types of injury that occur are:

1. Strains, both immediate and those that occur over time due to repeated movements.
2. Sprains, cuts and bruising. Fractures and dislocations also happen.

Anywhere in the musculo-skeletal system can be injured.

RISK ASSESSMENT

The purpose of a risk assessment is to:

1. Identify hazardous practices by looking at the **Task**, **Individual**, **Load** and the **Environment**. Then to decide what steps can be taken to reduce the risk of the existing conditions and to decide if further interventions are necessary.

The person carrying out the assessment should be:

1. Able to use the 'Four components of health and safety' in their **Organizational Skills**, **Task**, **Manual Handling Department**, **Department**, **Individual** and any circumstances or variables.
2. Able to use the processes being carried out.
3. Competent to carry out the task.

The assessment should be written down and the recommendations used upon future assessment procedures.
