Humans and Autonomous Vehicles Joseph Giacomini, 2022-11-30 This book provides an introduction to

the Human Centred Design of autonomous vehicles for professionals and students While rapid progress is being made in the field of autonomous road vehicles the majority of actions and the research address the technical challenges with little attention to the physical perceptual cognitive and emotional needs of humans This book fills a gap in the knowledge by providing an easily understandable introduction to the needs and desires of people in relation to autonomous vehicles The book is human centred design led adding an important human perspective to the primarily technology driven debates about autonomous vehicles It combines knowledge from fields ranging from linguistics to electrical engineering to provide a holistic multidisciplinary overview of the issues affecting the interactions between autonomous vehicles and people It emphasises the constraints and requirements that a human centred perspective necessitates giving balanced information about the potential conflicts between technical and human factors The book provides a helpful introduction to the field of design ethics to enhance the reader's awareness and understanding of the multiple ethical issues involved in autonomous vehicle design Written as an accessible guide for design practitioners and students this will be a key read for those interested in the psychological sociological and ethical factors involved in automotive design human centred design industrial design and technology

Systemic Aspects of Innovation and Design Marzia Mortati, 2013-12-05 The book provides a snapshot of a hot topic the systemic nature of innovation and its relevance to design with a trifold perspective the academic level the literature on innovation studies and design is often neglected and a clear connection between the two topics taken for granted the research level collaborative models are currently considered great opportunities for transforming consumption production and distribution of goods but a clear scholarly discourse is still forming the political level the European Commission and the OECD are devoting much effort to understanding and measuring the impact of design in innovation processes and firms and a clear contribution would greatly support this path Thus the book provides an informed historical and nuanced perspective to the relationship between design and innovation to contribute to all three levels and to propose a point of view that goes beyond aesthetics and meanings
